Comments on the text and Appendix		
Page #	Paragraph #	Comment
6	20 bullet 5	The study of the UNEP- WCMC says monitoring and evaluation, but reporting is not mention,
6	21	In order to have a unify technical needs identified for the post-2020 framework Technical capacities and thematic capacity development, should be a suggested list from the Executive Secretary, SBI and SBSSTA. Otherwise criteria will not be an unify.
7	Figure 1	All stakeholders are not represented. Due consistency of language should address: Women, youth and other relevant stakeholder groups
8	Box 1	It listed: Biodiversity partnerships, coalitions and networks established There is a need to name which... ¿such as? e.i. Local governments, academic communities, etc...  Footnote quote 22 can support this: 22 These could include the IUCN-led PANORAMA web platform, the NBSAP Forum, the UNDP-led International Capacity Development Network for Sustainable Water Management (Cap-Net), the CitiesWithNature initiative and others along the lines of the Climate and Development Knowledge Network (CDKN) or the Coalition on Paris Agreement Capacity Building.
8	Box 1	Intermediate, medium-term outcomes made direct reference to gender, and leaves out IPLC and youth. Due consistency of language should address:

		“indigenous peoples and local communities and stakeholder groups, including women and youth” Find previous quote from page 9 parra 25, page 6 parra 20 bullet 1 et al.
8	Box 1	In the output 5: Effective monitoring and evaluation (M&E) systems in place  Suggest adding “clear”and also considering “reporting”
9	27	Doesn’t mention IPLC and it is an endogenous capacity.
9	27 bullet 3	If there is a “Diversify capacity development delivery methods and approaches” it should have a counterbalance on a unify M&E System and could also add <b>reporting</b> .
9	27 bullet 5	“Target resources and activities at the ground level” should be communicate and connected to stakeholder and decision makers.
9	28	This part of the document is not link to a further consideration located in page 13 parra 41 “a need for more specific guidance and tools ... guidance could be undertaken by an expert group”.
10	28 bullet 1	Again, IPLC and youth inclusion is missing
10	30	It is very general to say “funding considerations”. It should be clear if the funds already exist or should be generated. Where are these funds coming from?
13	42	Consider that a “high-level Committee on Capacity Development” in a low budget context will be hard to develop and maintain unless a budget line is previously set.
14	44	“Related to this, international cooperation projects and programmes must be designed to foster long-term capacity development”  How, when?
