<b>Comments</b>	
<p>Please provide any general comments on the Appendix 1.</p> <p>Target 17. Establish, strengthen capacity for, and implement measures in all countries to prevent, manage or control potential adverse impacts of biotechnology on biodiversity and human health, reducing the risk of these impacts. I suppose that an indicator component should be the number of countries that applied vaccines against covid 19 with mRNA technology. This is a giant step in biotechnology and I don't see anything about it that is mentioned in these documents. since we talked about potential adverse impacts of biotechnology on biodiversity and human health.</p>
