Satoyama Initiative

- A component of NBSAPs -

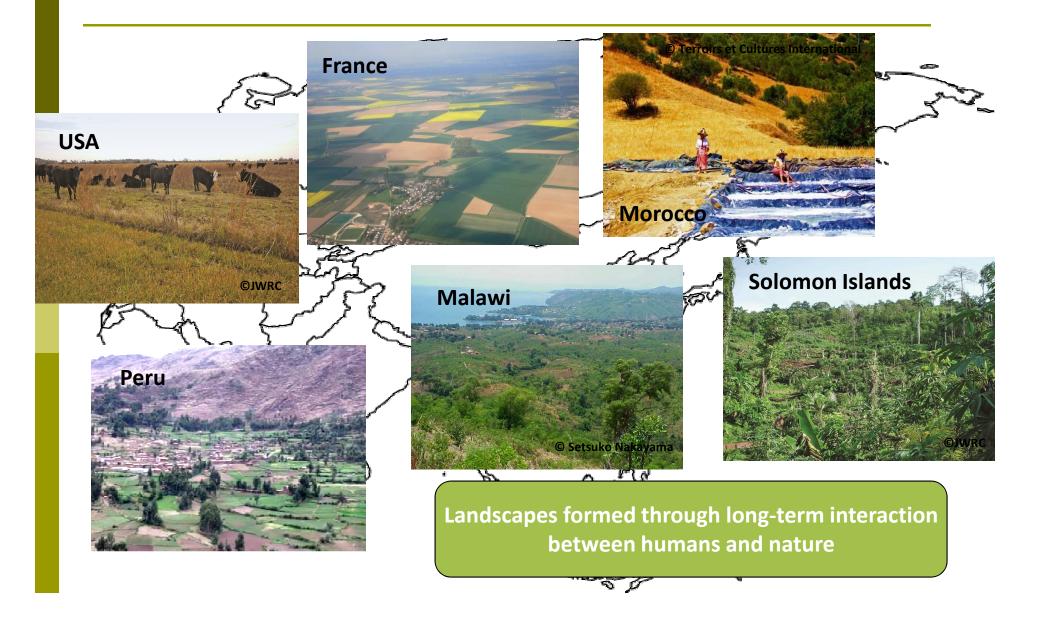

Aya Takatsuki, Ayumi Takahashi
Secretariat of the International Partnership for the *Satoyama* Initiative (IPSI)
United Nations University Institute of Advanced Studies (UNU-IAS)

11-15 December 2011, Minsk, Belarus

Socio-ecological Production Landscapes (SEPLs) around the World..

SEPLs are beneficial

Benefits

- Human well-being / livelihoods
- Poverty alleviation / MDGs
- Climate change mitigation and adaptation
- Achievement of biodiversity targets

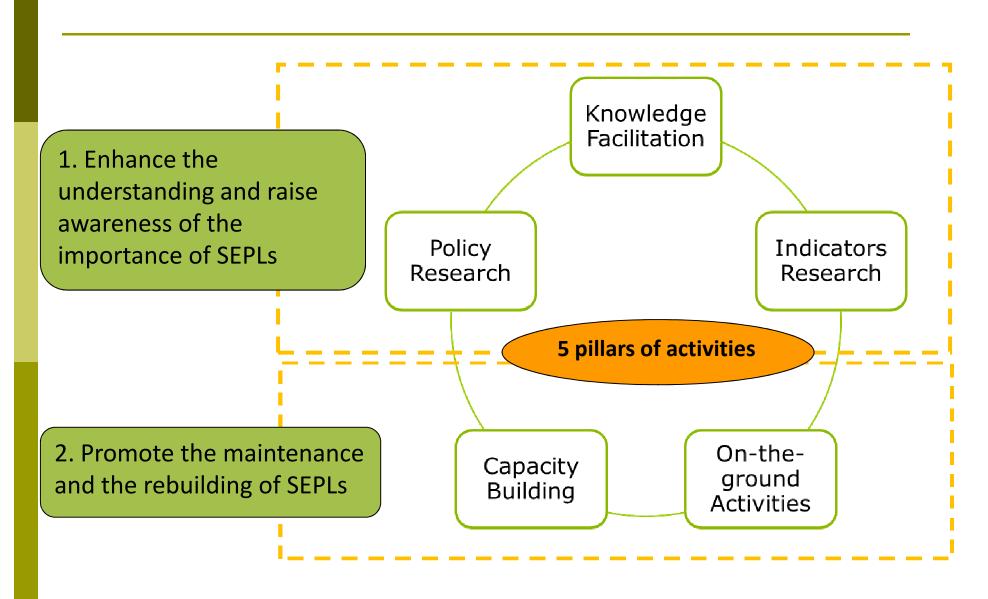

... but SEPLs are threatened

■ Threats

- Abandoned (rural depopulation, aging population etc.)
- Degraded (Population growth, overexploitation etc.)
- Lost (Unplanned urbanisation, industrialisation, natural disasters etc.)

What can we do?

Satoyama Initiative, concept

Satoyama Initiative, concept

Vision:

Societies in harmony with nature

Contribution to both
biodiversity and human
well-being in line with the
three objectives of the CBD

Approach:

- 1.Consolidate wisdom on securing diverse ecosystem services and values
- 2.Integrate traditional knowledge and modern science
- 3.Explore new forms of co-management systems

CBD COP-10 recognised the *Satoyama* Initiative as...

"useful tool to better understand and support human-influenced natural environments for the benefit of biodiversity and human well-being" (CBD COP10 Decision X/32)

The *Satoyama* Initiative can contribute to the implementation of the Strategic Plan and the Aichi Biodiversity Targets

- Strategic Plan for Biodiversity 2011-2020 and the Aichi Biodiversity Targets
 - ✓ Share its vision of "Living in harmony with nature", and
 - ✓ Strategic goal D "Enhance the benefits to all from biodiversity and ecosystem services", especially
 - ✓ Target 14: "By 2020, ecosystems that provide essential services, including services related to water, and contribute to health, livelihoods and well-being, are restored and safeguarded, taking into account the needs of women, indigenous and local communities, and the poor and vulnerable.

International Partnership for the Satoyama Initiative (IPSI)

Platform for securing synergies, maximizing resources, mutual strengthening of activities under the Satoyama Initiative

IPSI activities, Collaborative, event etc

- Platform for local, national, regional and global actions
- 15 Activities are now collaboratively develop among members.

IPSI Collaborative Activities

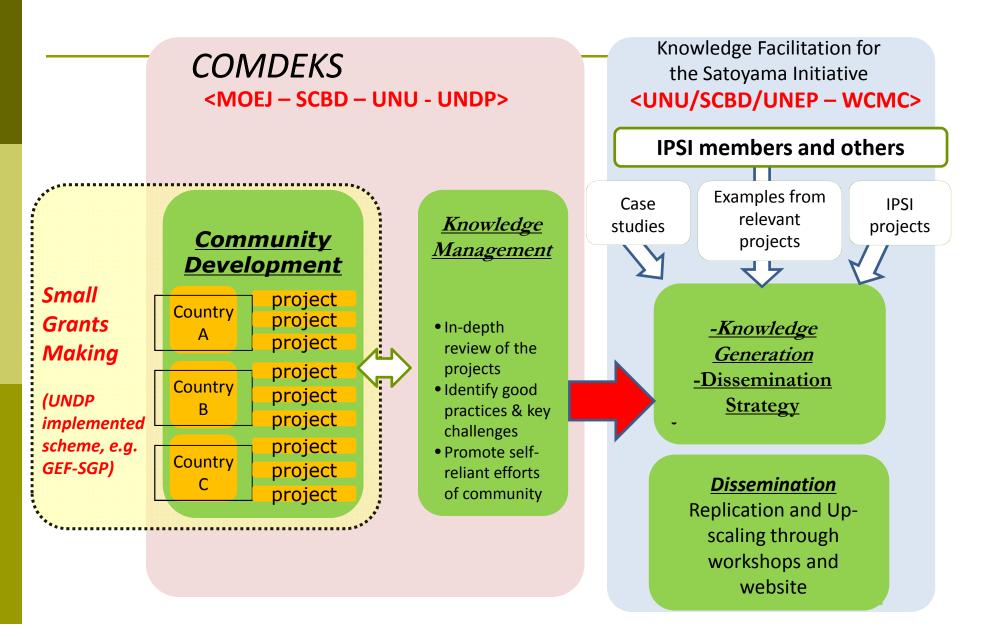

and past events.

The International Partnership for the Satoyama Initiative (IPSI) aims to carry out activities under the Satoyama Initiative concept for the benefit of biodiversity and human well-being.

IPSI activities, e.g.) COMDEKS (UNDP, SCBD, MOEJ, UNU through GEF-SGP)

- Community Development and Knowledge Management for the **Satoyama** Initiative (COMDEKS)
- 10 target countries: Brazil, Cambodia, Ethiopia, Ghana, Fiji, India, Malawi, Nepal, Slovakia and Turkey (Grenada will join as 11th country when a in-country small grants scheme is established)
- Each country will receive US\$ 127,272 for grant-making (July 2011-June 2012); UNDP mobilizes the same amount as co-financing; the size of community grant will be \$20,000 -50,000
- Local community-based organizations (landscape level) are eligible to apply for small grants
- Case studies to be developed for KM and learning
- Programme has 5 year-scope

IPSI activities, e.g.) COMDEKS, how it works

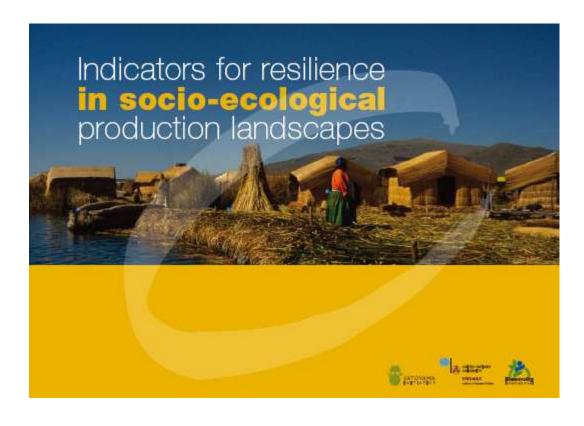

Other IPSI activities Case Study database: Knowledge Sharing

Other IPSI activities

- Indicators of resilience in socio-ecological production landscapes
- □ Great East Japan Earthquake Rebuilding Symposium
- □ SBSTTA15 side event

"Challenges and Hopes in Ecosystem Restoration"

The Satoyama Initiative can be taken into consideration in NBSAPs

- A useful tool to address biodiversity and development issues in a holistic manner
- Working in line with the three objectives of the CBD, as well as the Strategic Plan and its Aichi Biodiversity Targets
- Global and multi-sectoral partnership
 - → Mainstreaming biodiversity

Thank you very much !
