

NAURU

NBSAP

Commerce Industry and Environment

Project Division

6th October 2011

Tanoa Hotel, Nadi, Fiji

NBSAP Overview

- ▶ Nauru's NBSAP finally completed but is yet endorsed by Govt.
- ▶ As anticipated most of the core thematic areas identified in the NBSAP will be implemented under the GEFPAS 4.
- ▶ Nauru NBSAP key theme is to Rehabilitate and Conserve.
- ▶ Most Countries are revising and updating their NBSAP but we are implementing our first NBSAP.

Main Priorities NBSAP

- ▶ Conservation and Management of Island Biodiversity.
- ▶ Environment Education and Awareness (formal informal outreach, local communities engagement and involvement)
- ▶ Sustainable use and management of marine & terrestrial resources with traditional and customary land and marine tenure systems
- ▶ Develop National Policies and Legal Framework
- ▶ Capacity Building for environmental management

Progress Forward

- ▶ Implement NBSAP main core areas under the GEFPAS 4 project
Integrated Island Biodiversity

Project component :

- Priorities Species and Ecosystems
- Terrestrial areas of particular importance to biodiversity conserved as conservation areas
- Marine areas of particular importance to biodiversity conserved as conservation areas
- Plans for the sustainable use of native species are developed with full stakeholder participation.
- Improved information, systems, processes are planned or in place in relevant agencies, to support implementation of the IBPOW .
- Information reviews and surveys undertaken to identify priority sites for conservation
- Legislation, regulations and policies developed for sustainable management of biodiversity and conservation area establishment
- Information management systems established or re-configured

Thank you
