

SAP/ NR FOR BOTSWANA

POST 2010 TARGETS

There are many targets that could be used for Botswana these include the following

- Improving Water security by re using and recycling waste water
- Improving Agro biodiversity in the country that is faced with arid conditions i.e. furthering the efforts of the government to encourage farming by providing crop varieties that take less time to mature and also encourage intensified farming
- Promoting Desert tourism
- Providing funds for projects to be implemented to achieve the targets of the strategic plan
- Assistance to developing environmental indicators for Botswana

Capacity Building requirements for Botswana on Strategy and Action Plan implementation and National Reporting

- Project management for effective management of the existing projects
- Strengthen NGOs and Private business to ensure their role in biodiversity management
- Data management preceding preparation of the national report
