### Information on the preparation of the report

**Box I.**

Please provide information on the preparation of this report, including information on stakeholders involved and material used as a basis for the report.

Three (3) consultations were held with key stakeholders: Among others, Fisheries Division, Forestry Division, Environmental Co-ordinating Unit, Solid Waste Unit, Division of Agriculture, Physical Planning Department, Bureau of Standards. This was followed by one to one interviews with other officials and email contacts with participants on the consultation day for clarification and additional information.

## B. PRIORITY SETTING, TARGETS AND OBSTACLES

### Box II.

Please provide an overview of the status and trends of various components of biological diversity in your country based on the information and data available.

Dominica, the Nature Island of the Caribbean has in place much good practice and accompanying legislation preceding and independent of our obligation to the convention on biological Diversity. However the way in which the Convention requires reporting does not always provide the some for the full extent of our good practice to be represented. Our major need still however remains in the drawing up of legislation with regulations, funding to escalate our public education campaign, funding for research on specific aspects of our biological diversity (especially the creation of inventories) and funding for offices to encourage compliance. Two of the many immediate concerns are our limited capacity in the area of invasive species and the lack of political will to tackle the effects of quarrying on our marine resources.

### Priority Setting

1. Please indicate, by marking an "X" in the appropriate column below, the level of priority your country accords to the implementation of various articles, provisions and relevant programmes of the work of the Convention.
