

**Box 13: Integration of Biodiversity Concerns in Programmes of Ministry of Tribal Affairs**

- Grants-in-aid to State Governments for supporting family/self-help groups/ community towards employment and income generation in sectors such as agriculture, horticulture, land reforms, watershed development, animal husbandry, ecology and environment, development of forests and forest villages, etc., with priority to be accorded to the tribals living in forest villages and synchronization of these programmes with JFM.
- In pursuance of article 275(1) of the Constitution of India, 100% central grants-in-aid to the states for promoting welfare of scheduled tribes for raising the level of administration of scheduled areas.
- Programme for integrated development of forest villages with a view to raise the Human Development Index (HDI) of their inhabitants and provision of basic facilities and services.
- Programme for infrastructure development relating to basic services and facilities such as approach roads, healthcare, primary education, minor irrigation, rainwater harvesting, drinking water, sanitation, community halls, etc., covering 2338 forest villages in 11 States.
- The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006, which has come into force with effect from 31.12.2007; and the Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Rules, 2007, which have come into force with effect from 01.01.2008.

communities to meet their economic needs compatible with ecological sustainability. For instance, use of invasive species like Lantana for making value added products; and building upon traditional technologies like watermill for power generation in mountains as clean technology developed and customized at field level. The seminal idea is to involve all possible stakeholders, especially women, who are the custodians of natural resources and their management, to provide technology-based-livelihood opportunities to reduce their dependency on bio-resources. Participation of private sector in R&D also needs to be further encouraged. Institutional and human capacity needs to be constantly strengthened and updated to meet the new and emerging challenges relating to biodiversity, e.g. in the fields of biosafety, climate change, and invasive alien species.

There is need to look at the profiles of on-going education, training and extension programmes to lay directed focus on biodiversity conservation.

#### Action Points

- Develop consortium of lead institutions engaged in conservation providing linkages and networking across public and private sectors.
- Outsource research and promote joint ventures on key conservation issues.

- Promote application of biotechnology tools for conserving endangered species.
- Encourage DNA profiling for assessment of genetic diversity in endangered species to assist conservation.
- Develop DNA-probe based technology for tracking of LMOs.
- Develop specific pilot gene banks for LMOs approved for undertaking research and commercial use.
- Develop capacity for risk assessment, management and communication on LMOs.
- Support pilot studies on use of biotechnology tools for conservation where appropriate.

- Develop specific complimentary capacity building measures based on national needs and priorities for the formulation and implementation of national rules and procedures on liability and redress to strengthen the establishment of baseline information and monitoring of changes.
- Develop protocols for monitoring products based on genetic use restriction technologies.
- Strengthen participatory appraisal techniques and encourage formation of local institutional structures for planning and management of natural resources for ensuring participation of women.
- Preserve and strengthen traditional, religious, ritualistic, ethical and cultural methods of conservation.
- Promote livelihood diversification opportunities for making value added bioresource based products and building upon traditional as well as emerging environmental technologies customized at local/field level.
- Strengthen manpower, infrastructure and other pertinent capacities including upgradation of skills of officials of the MoEF to enable it to address new and emerging requirements in the field of biodiversity conservation and management.
- Strengthen capabilities of BSI and ZSI and promote their technical cooperation with SBBs and BMCs.
- Augment human resource development and personnel management in forestry and wildlife sector.

- Strengthen multidisciplinary R&D efforts on key areas pertaining to conservation and management of biological diversity.
- Strengthen and support departments of biology, botany, zoology, sociology, anthropology and other relevant disciplines in central, state and deemed universities/colleges, with a view to raising the standard of research and producing faculty who could guide the process of environmental education in schools.
- Promote both formal and non-formal means for environment education and biodiversity conservation.
- Design and implement awareness programmes, particularly for rural women, and also benefit from their wisdom. Women's organizations such as women's councils and mahila mandals could be used for this purpose.
- Incorporate modules on conservation and sustainable utilization of biodiversity in foundational and professional training courses for the officers of various services.

- Promote and/or strengthen education, training, awareness and extension programmes on biodiversity issues for various stakeholders including all levels of students, professionals (such as engineers, doctors, lawyers, CAs, etc.), elected representatives (such as representatives of PRIs, MLAs, MPs, Mayors, etc.), judiciary, NGOs, public and private sectors (e.g. corporate representatives, industrial associations etc.), defence and para military forces, customs, police, media, cultural, spiritual and religious institutions/individuals.
- Enhance public education and awareness for biodiversity conservation through audio, visual and print media.
- Promote activities relating to animal welfare.

## **5.10 Valuation of goods and services provided by biodiversity, and use of economic instruments in decision making processes**

It is necessary that the costs associated with the degradation and depletion of natural resources be incorporated into decision-making, to reverse the tendency to treat these resources as free goods. At the macro-level, a system of natural resource accounting is required to assess whether in the course of economic growth, we are drawing down, or enhancing the biological resource base. In addition, the costs and benefits associated with various activities, including sectoral policies, should be evaluated to ensure that these factors are duly taken into account in decision-making.

There is also a need to move from the current near exclusive reliance on regulations, to a judicious mix of incentives and regulatory instruments.

### **Action Points**

- Develop a system of natural resource accounting reflecting the ecological as well as economic values of biodiversity, with special attention to techniques of green accounting in national accounts and estimation of positive and negative externalities for use of various types of natural resources in the

production processes as well as in household and government consumption.

- Develop suitable valuation models for adoption at national, state and local levels.
- Support projects and pilot studies aimed at validating methods of valuation of bioresources.
- Identify key factors and indicators to assess effectiveness of valuation methods and models, taking into consideration the UN guidelines on monitoring and evaluation of socio-economic projects.
- Assess the utility of traditional and innovative fiscal instruments for promoting conservation and sustainable utilization of biodiversity.
- Develop systems for partial ploughing back of the revenues generated in protected areas, zoological parks, botanical gardens, aquaria, etc., for improving their management.
- Mobilize additional resources based on project formulation for biodiversity conservation.

## **5.11 International cooperation**

India has participated in major international events on environment and biodiversity conservation since

1972. India has also contributed to developing the agreed texts, ratified, and complied with the commitments in various international conventions relating to biodiversity. These agreements are: Convention on Biological Diversity (CBD), Convention on International Trade in Wild Species of Endangered Flora and Fauna (CITES), Ramsar Convention on Wetlands, World Heritage Convention, and the Bonn Convention on Conservation of Migratory Species (CMS). Some other international agreements which have bearing on biodiversity to which India is a Party include UNFCCC, UNCCD, Commission on Sustainable Development, World Trade Organisation, International Treaty on Plant Genetic Resources for food and agriculture and UN Law of the Seas.

A ‘Global Tiger Forum’ of tiger range countries has been created for addressing international issues related to tiger conservation.

India has also actively supported numerous regional and bilateral programmes on biodiversity. The MoEF, the nodal Ministry for the CBD and other biodiversity related conventions, is also the nodal agency in the country for the United Nations Environment Programme (UNEP), SACEP, ICIMOD, and IUCN. It has institutionalized the process for developing country’s position on major issues for negotiations under different international conventions.

In this context, the MoEF is continuously taking steps to harmonise national policies and programmes in implementation of various multilateral environment

agreements, based on active involvement of various stakeholders. The MoEF functions in partnership with a number of institutions for developing and implementing national strategies on conservation and sustainable use of biological diversity. These partners include Ministries, State Government departments, universities, other academic institutions, autonomous bodies, women’s organizations and NGOs.

India along with sixteen other megadiverse countries, rich in biodiversity and traditional

knowledge, has formed a group known as the Like-Minded Megadiverse Countries (LMMCs). These countries are Bolivia, Brazil, China, Colombia, Costa Rica, Democratic Republic of Congo, Ecuador, Indonesia, Kenya, Madagascar, Malaysia, Mexico, Peru, Philippines, South Africa and Venezuela. The LMMCs hold nearly 70% of all biodiversity. India chaired the LMMCs for a two-year period from March 2004 to March 2006, and coordinated the activities of this group focusing particularly on access and benefit sharing issues under the CBD.

Access to genetic resources and sharing of the benefits arising out of these resources form the core elements of the Convention. While access and benefit sharing is subject to national legislations, as provided for in Article 15 of the CBD, national action alone is not sufficient to ensure benefits to the country that provides the resources, particularly in instances where the genetic resource is utilized in another country for developing processes and products on which protection is obtained. In this background, an international regime (IR) on ABS is presently being negotiated by a Working Group on ABS under the aegis of the CBD, pursuant to a landmark decision of seventh Conference of Parties (COP) to the CBD. The eighth COP held in March 2006 has set a deadline of 2010 for completing the negotiations of IR on ABS. The ninth COP held in May 2008 has developed a detailed road map for completing the negotiations before COP-10 to be held in 2010.

Notable progress in this area notwithstanding, concerted efforts are now required to further improve

bilateral, regional and multilateral cooperation, as also cooperation with UN agencies and other international organizations on issues related to biodiversity. There is also a need to enhance our own capacities to comply with commitments, and ensure sustained flow of resources for biodiversity management.

#### Action Points

- Further consolidate and strengthen global cooperation, especially with UN agencies and other international bodies on issues related to biodiversity.
- Promote regional cooperation for effective implementation of suitable strategies for conservation of biodiversity, especially with neighbouring countries through fora such as SAARC, ASEAN and ESCAP.
- Develop projects for accessing funds for conservation and sustainable use of biodiversity from external sources, earmarked for conservation through bilateral, regional and other multilateral channels.
- Promote technology transfer and scientific cooperation towards conservation of biological resources, their sustainable use and equitable sharing of benefits arising out of their use, taking also into account extant regulations including those relating to taxation.

The preceding chapter outlines a number of new and continuing activities for augmenting biodiversity conservation. Considering that the subject of biodiversity is cross sectoral in nature, the implementation of these activities would be heavily dependent on coordinated efforts of diverse actors, including the concerned Central Ministries/ Departments, State Governments, local institutions, research institutions, various organizations both government and non-government, and people themselves. The NBA established on 1st October, 2003 under the Biological Diversity Act and the SBBs and local BMCs which are in process of being established under the same Act, would also have to be actively involved in a number of actions.

Since many of the activities envisioned in the NBAP are ongoing, these would be taken up and mainstreamed under the ambit of existing schemes

and programmes by the Central and State governments, public and private sector as well as civil society organizations, securing full utilization of available infrastructure and funds, with marginal to substantial augmentation and further inputs, wherever required. In addition, sources of external funding would also be explored and availed of, in accordance with the extant policies and regulations. Thus, no separate scheme or allocation for implementation of NBAP is envisaged.

As regards the time frame for implementation of these activities, these would be taken up in the short term (within 5 years), medium term (between 5 and 10 years), or long term (beyond 10 years) basis. Most of the activities are already operational or planned, and the time frame as mentioned against each in the matrix is indicative of the term when optimal level of implementation will be achieved.

A tabulated matrix for implementation of the key activities of NBAP, indicating the implementing agencies and time frame for each of these activities is given below. The list of implementing agencies listed in the matrix is only indicative.

**MATRIX FOR IMPLEMENTATION OF KEY ACTIVITIES OF NBAP**

S. No.	Actions	Activities	Coordinating agency	Associated agencies	Time frame
1	<p>Strengthening and integrating <i>in situ</i>, on-farm and <i>ex situ</i> conservation</p> <ul style="list-style-type: none"> <li>• Expand the Protected Area (PA) network of the country giving representation to all bio-geographic zones.</li> <li>• Establish self-sustaining monitoring system for overseeing the activities and effectiveness of the protected area network.</li> <li>• Mitigate man-animal conflicts.</li> <li>• Promote site-specific eco-development programmes in fringe areas of PAs.</li> <li>• Promote voluntary relocation of villagers from critical habitats of PAs.</li> <li>• Devise effective management and conservation techniques for the forest preservation plots.</li> <li>• Strengthen research work on protected areas, biosphere reserves and fragile ecosystems.</li> <li>• Strengthen the protection of ecologically sensitive areas of high endemism of genetic resources ( biodiversity hotspots).</li> <li>• Promote inter-sectoral consultations and partnerships in strengthening biodiversity conservation activities.</li> <li>• Control poaching and illegal trade in wild animals and plant species.</li> <li>• Strengthen capacities and implement measures for captive breeding and release into the wild, of identified endangered species.</li> <li>• Promote ecologically and socially sensitive tourism and pilgrimage activities.</li> <li>• Promote conservation of biodiversity outside the protected area network, on private property, on common lands and water bodies.</li> <li>• Identify hotspots of agro-biodiversity under different agro-ecozones and cropping systems and promote on-farm conservation.</li> <li>• Provide economically feasible and socially acceptable incentives like value addition and direct market access in face of replacement by other economically remunerative cultivars.</li> <li>• Develop appropriate models for on-farm conservation of livestock herds maintained by different institutions and local communities.</li> <li>• Develop mutually supportive linkages between <i>in situ</i>, on-farm and <i>ex situ</i> conservation programmes.</li> <li>• Focus on conservation of genetic diversity (<i>in situ, ex situ, in vitro</i>) of cultivated plants, domesticated animals and their wild relatives to support breeding programmes.</li> <li>• Strengthen national <i>ex situ</i> conservation system for crop and livestock diversity including poultry linking national gene banks, clonal repositories and field collections, maintained by different research centers and universities.</li> </ul>	<ul style="list-style-type: none"> <li>- MoEF</li> <li>- MoA</li> <li>- DAHDD&amp;F</li> <li>- MoA &amp; MoEF</li> <li>- MoA</li> </ul>	<ul style="list-style-type: none"> <li>➤ State/U.T. ## LIST OF PHOTOGRAPHS

### FRONT COVER (clockwise)

Tiger  
 Red star glory - *Ipomoea hederifolia*  
 Deer  
 Rhinoceros  
 Peacock  
 Bulbul – a bird  
 Coral  
 Butterfly  
 Mangrove forests  
 Rose

### INSIDE OF COVER PAGE

River flowing through forest

### INSIDE PAGES

Page no.	Photo
1.	A lone tusker
3.	Tiger in the mangroves in Sundarbans Water lily – <i>Nymphaea coerulea</i>
5.	Flock of pelicans
6.	Corals at Lakshadweep Lions in Gir forests
7.	Painted storks roosting on tree top
8.	Beauty and grandeur of dancing Indian male peacock Coconut: A multi-purpose plant in coastal region
9.	The Great one-horned Rhinoceros in Kaziranga
10	Butterfly
11.	Brahm Kamal in Nanda Devi A forest patch in Western Ghats
12.	Endangered Red Panda in bamboo environs
13	An invasive alien species - <i>Phalaris minor</i>
14.	Industrial emissions Sewage Treatment Plant
15.	A fungus Bat anchoring on a twig
16.	A high altitude lake in Kanchanjunga Life forms under sea
17.	Double helix DNA
18.	<i>Tragopan</i>
19.	Show of strength by women pledging to save environment
20.	Coral from Andaman & Nicobar Islands

Page no.	Photo
21.	Joining hands to green wastelands
22.	A herd of chital
23.	Terrace cultivation – a panoramic view
24.	Leopard
25.	Glimpses of wildlife in various protected areas
26	Sheep grazing in hilly grassland A group of swamp deer
28.	Great Indian Bustard - <i>Ardeotis nigriceps</i>
29.	Vulture
30.	Different varieties of brinjal
31.	Rhododendron
32.	Containment facility at NBPGR
33.	An owl
34.	Bamboo basketery
35.	<i>Gloriosa superba</i> – a medicinal herb Langur
36.	Young Storks in their nest
37.	Extracting honey from the comb in Sunderbans
38.	<i>Lantana camara</i>
39.	<i>Rhizophora mucronata</i> with arching stilt roots anchoring in the coastal mud Coastal Ecotourism: Recreational scuba diving
40.	Chandratal: A wetland of national importance
42.	Sewage treatment plant at Chennai
43.	Blue flycatcher
44.	Wild ass – Flagship species of Kachch Biosphere Reserve
46.	Scenic course of a river
47	A marine mollusc
50.	Sambhar
51.	Plentiful fish catch by local fishermen Ambience of coastal ecotourism in Lakshadweep
52.	Humboldia tree
53.	Toad Bacurea tree
54.	Muli bamboo in Mizoram Cochin Forest Cane Turtle
55.	A male Asiatic lion Mangrove forest
