Please provide information on any particular circumstances in your country that are relevant to understanding the answers to the questions in this report

The Ministry of Environment and Social Development (MESD) through Environment and Conservation Division is the executing agency at the national level. The implementation of the National Biodiversity Strategy and Action Plan project has marked a national commitment towards meeting the obligations of Kiribati as a Party to the Convention on Biological Diversity.

Under the NBSAP Project, a multi-discipline Steering Committee consisting of key government Ministries and agencies including key Non-Government Organizations that have prominent roles in natural resources and environment management. The Steering Committee endorsed and approved all action plans that have been planned by the NBSAP Planning Team. The Planning Team consists of those members of the NBSAP Steering Committee members, who are representatives of key government agencies and NGOs that have prominent roles in natural resources and environment management.

The Planning Team is the technical arm of the NBSAP Project and are responsible for planning and undertaking action plans for the Project. All action plans are put up to the NBSAP Steering Committee for approval before the implementation is undertaken.

All members of the NBSAP Steering Committee are participating and contributing to the completion of this report through committee meetings and individual consultations with key government officials, who are able to provide direct inputs to the relevant questions concerned.

The COP has established programmes of work that respond to a number of Articles. Please identify the relative priority accorded to each theme and the adequacy of resources. This will allow subsequent information on implementation of each Article to be put into context. There are other questions on implementation of the programmes of work at the end of these guidelines.

Further comments on work programmes and priorities

- The Government of Kiribati is now promoting the importance of trees and agro-forestry. Examples include studies on mangrove forest and the establishment of nurseries for native and indigenous trees as well as the conservation of *Pisonia grandis* forest.
- Priorities are also given towards community-based conservation programmes. The Environment and Conservation Division is currently involved in undertaking biodiversity surveys on terrestrial and marine species that have ecological and cultural importance for the people of Kiribati.
- Natural resources inventory and stocktaking assessment is still ongoing. The major output of this assessment on completion would be the production of a national list of terrestrial and marine flora and fauna species that are ecologically and culturally significant for the people of Kiribati.
- Follow-up community consultations are in the pipeline. The output of these follow-ups would provide updated information and data on the status of national biodiversity based both theoretically and practically (e.g. consultations with local people and fieldwork research).

<p>A mechanism is already in place but it is important to understand that there are financial rules of proceeding already existing in most countries, which are unique to that particular country. In some instances there are bound to be conflicts upon the decisions decided by the COP and that can cause considerable delays in sorting the problems arising from those conflicts. It is important to emphasise here that all countries have their own differences. The policies, strategies, programme priorities eligibility that were decided by the COP can be difficult to implement sometimes considering the differences of each member country. It is important that there is flexibility in the implementation of the COP decision to cater for the many differences that exist in most countries.</p>

Examples include studies on mangrove forest and the establishment of nurseries for native and indigenous trees and the conservation of *Pisonia grandis* forest.
