### A. REPORTING PARTY

Contracting Party	State of Qatar
N.	ATIONAL FOCAL POINT
Full name of the institution	Supreme Council for the Environment and Natural Reserves (SCENR)
Name and title of contact officer	Ghanim Abdullah Mohammed Director of Wildlife Conservation
Mailing address	Doha, P.O. Box : 7634 State of Qatar
Telephone	+974 4583635 ext :111
Fax	+974 4583310
E-mail	gamohammad@qatarenv.org.qa
CONTACT OFFICER FO	OR NATIONAL REPORT (IF DIFFERENT FROM ABOVE)
Full name of the institution	Same details as above
Name and title of contact officer	
Mailing address	
Telephone	
Fax	
E-mail	
	SUBMISSION
Signature of officer responsible for submitting national report	
Date of submission	

#### Information on the preparation of the report

#### Box I.

Please provide information on the preparation of this report, including information on stakeholders involved and material used as a basis for the report.

The following documents were consulted in the preparation of the report:

Abulfatih, H.A., El-Sharief Abdalla, O.A., and Al-Yousuf, A.H. 1999. Desertification and Natural Resources in Qatar, Department of Agriculture and Water Research. Doha.

Abulfatih, H.A., Abdel Bari, E.M., Alsubaey, A., and Ibrahim, Y.M. (2001). Vegetation of Qatar. SARC, University of Qatar, Doha.

Abushama, F, et. al. 2002 *Biodiversity Inventory*. University of Qatar, Doha.

Al-Quaisi, Tewfik, Birds of Qatar, Doha, Qatar.

Aspinall, S., Phillips, R., Boer, B., Schwarze, H., Gillespie, C., Al Alenzi, K., Al Hitmi, E., Al Muraikhi, N. and Al Safran, S. 2002. Biosphere Reserve Study, Qatar: Rapid Assessment of Potential Biosphere Reserves in Qatar. UNESCO, Doha.

Batanouny, Kamal, *Flora in Qatar*, Doha, Qatar. SCENR 2004. National Biodiversity Strategy and Action Plan, State of Qatar. SCENR, Doha

SCENR, 2003. Qatar Marine Environment Monitoring Program (QMEMP). SCENR,Doha.

SCENR, 2002 Wild Animals in the Qatari Environment. SCENR, Doha

### **B. PRIORITY SETTING, TARGETS AND OBSTACLES**

#### Box II.

Please provide an overview of the status and trends of various components of biological diversity in your country based on the information and data available.

Despite its arid nature Qatar has a fairly rich biodiversity profile. A total of about 1955 species of fauna and flora have been reported from Qatar, of which 955 species are marine. Though there has been a general trend of biodiversity decline, this has been arrested by concerted conservation efforts of the recent years. The country has 8 mammalian species in the terrestrial biome while the avifauna stands at 242 species. Qatar has 29 reptelian spcies, one amphibian and 228 terrestrial invertebrates. The flora is composed of 513 species, of which 142 are fungi. The flowering plants belong to 236 genera of 61 families.

Of the terrestrial fauna about 26 species are considered to be at various levels of risk. These include the Greater spotted eagle, Lesser kestrel, Socotra cormorant and Houbara bustard.

Qatar's 700 km stretch of sea is home to 955 species including 3 mammals, 15 reptiles, 136 fish species and 379 species of plants. Qatar is home to five of the globally endangered turtle species (Hawksbill, and Green turtles). Dugong also has a precarious status in the country as elsewhere in its range.

The conservation program that the country is embarked upon is yielding positive results in terms of species recovery and habitat restoration. A national network of protected areas has been established although it still needs to be expanded and further strengthened in management. The wild-extinct Arabian oryx has been reintroduced through captive breeding and so has been the Rheem gazelle. The legal and institutional mechanism has been strengthened to address the modern conservation challenges. The National Biodiversity Strategy and Management Plan developed in 2004 serves as an important framework for the biodiversity management program in the country.

# **Priority Setting**

**1.** Please indicate, by marking an " $\mathbf{X}$ " in the appropriate column below, the level of priority your country accords to the implementation of various articles, provisions and relevant programmes of the work of the Convention.

Article/Provision/Programme of Work	Le	vel of Prio	rity
Article/ Provision/ Programme of Work	High	Medium	Low
a) Article 5 – Cooperation	X		
b) Article 6 - General measures for conservation and sustainable use	X		
c) Article 7 - Identification and monitoring	Х		
d) Article 8 – <i>In-situ</i> conservation	X		
e) Article 8(h) - Alien species		Х	
f) Article 8(j) - Traditional knowledge and related provisions	Х		
g) Article 9 – Ex-situ conservation	X		
h) Article 10 – Sustainable use of components of biological diversity	X		
i) Article 11 - Incentive measures		X	
j) Article 12 - Research and training	X		
k) Article 13 - Public education and awareness	X		
l) Article 14 - Impact assessment and minimizing adverse impacts	X		
m) Article 15 - Access to genetic resources		X	
n) Article 16 - Access to and transfer of technology		X	
o) Article 17 - Exchange of information	X		
p) Article 18 – Scientific and technical cooperation	X		
q) Article 19 - Handling of biotechnology and distribution of its benefits		Х	
r) Article 20 - Financial resources	Х		
s) Article 21 - Financial mechanism	X		
t) Agricultural biodiversity			х

u) Forest biodiversity		х
v) Inland water biodiversity	X	
w) Marine and coastal biodiversity	X	
x) Dryland and subhumid land biodiversity	X	
y) Mountain biodiversity		х

# **Challenges and Obstacles to Implementation**

**2.** Please use the scale indicated below to reflect the level of challenges faced by your country in implementing the provisions of the Articles of the Convention (5, 6,7, 8, 8h, 8j, 9, 10, 11,12, 13, 14, 15,16, 17, 18, 19 and 20)

3 = High Challenge	1 = Low Challenge
2 = Medium Challenge	0 = Challenge has been successfully overcome

# N/A = Not applicable

# 2010 Target

The Conference of the Parties, in decision VII/30, annex II, decided to establish a provisional framework for goals and targets in order to clarify the 2010 global target adopted by decision VI/26, help assess the progress towards the target, and promote coherence among the programmes of work of the Convention. Parties and Governments are invited to develop their own targets with this flexible framework. Please provide relevant information by responding to the questions and requests contained in the following tables.

#### Box III.

Goal 1	Goal 1 Promote the conservation of the biological diversity of ecosystems, habitats and biomes.											
Target 1.1	At least ter effectively co	<del>-</del>	t of each	of the	world's	ecological	regions					
I) National target: Has a national target been established corresponding to the global target above?												
a) No												
b) Yes, the same as the global target X												
c) Yes, one or more	specific nation	al targets	have been e	stablishe	d							
Please provide detail	s below.											
The NBSAP has establi of the terrestrial area of				tected ar	ea system	to cover 17	per cent					
II) National targets for specific programmes of work: If such national target(s) ha(s)(ve) been established, please indicate here, and give further details in the box(es).												
Programme of w	ork Yes	No			Details							

a) Agricultural	X	Qatar's Agenda 21, and the agricultural policy and programs being pursued are in line with the program of work
b) Inland water	X	(Qatar's inland water ecosystems are limited to farming lagoons and ephemeral streams and pools in the wadis.)
c) Marine and coastal	x	The NBSAP has outlined the action plans as well as indicators in this respect
d) Dry and subhumid land	x	Restoring the aridland biodiversity is a key element of the NBSAP.
e) Forest	x	Conservation of mangrove biodiversity, though limited in coverage, is part of NBSAP
f) Mountain		N/A

# III) Has the global or national target been incorporated into relevant plans, programmes and strategies?

a) No	
b) Yes, into national biodiversity strategy and action plan	X
c) Yes, into sectoral strategies, plans and programmes	X

#### Please provide details below.

NBSAP incorporates the targets as mentioned above. Sectoral plans in areas such as agriculture address this.

#### IV) Please provide information on current status and trends in relation to this target.

Implementation is in progress.

#### V) Please provide information on indicators used in relation to this target.

Indicators are provided in the NBSAP. The indicators, for example, with regard to coastal ecosystem and marine biodiversity are:

- Number of endangered species of marine and coastal flora and fauna.
- Number of marine species and their increase/decrease per unit area.
- Size and composition of the fisheries catches.
- Number of incidental deaths of species of special management concern.
- Level of chemical and biological pollutants.
- Level of litter and tar balls on the shore.
- Level of coastal shore erosion.
- Number of marine research institutions, the qualifications of their staff and the quality and quantity of their publications

#### VI) Please provide information on challenges in implementation of this target.

There is an inadequacy of trained manpower to meet the growing demands.

#### VII) Please provide any other relevant information.

A cross-sectoral approach is adopted in pursuing this as well as other targets.

### Box IV.

Target 1.2	Areas	of par	ticula	r importance to biodiversity prote	cted						
I) National targe	et: Has a nati	onal tar	get be	en established corresponding to the g	lobal target above?						
a) No											
b) Yes, the sa	ame as the glo	obal tar	get		Х						
c) Yes, one o	c) Yes, one or more specific national targets have been established										
Please provide details below.											
II) National targets for specific programmes of work: If such national target(s) ha(s)(ve) been established, please indicate here, and give further details in the box(es).											
Programme o	of work	Yes	No	Details							
a) Agricultura	al	x									
b) Inland wat	er	X									
c) Marine and	d coastal	Х									
d) Dry and su	ıbhumid land	X									
e) Forest		X									
f) Mountain				Not applicable							
III) Has the glo strategies?	bal or natio	nal targ	jet be	en incorporated into relevant plans	s, programmes and						
a) No											
b) Yes, into n	ational biodiv	ersity st	trateg	y and action plan	X						
c) Yes, into s	ectoral strate	gies, pla	ans an	d programmes	x						
Please provide	details below	<i>I</i> .									
The Qatar Natio targets	nal Biodivers	ity Stra	tegy a	and Action Plan and the different se	ctoral strategies set						
IV) Please provid	de informatio	n on cur	rent s	tatus and trends in relation to this tar	get.						
Consistent progress is being achieved.											
V) Please provid	de informatio	n on ind	icators	s used in relation to this target.							
Indicators for pro  • Number tribution	of officially re			re: estrial, marine and coastal) protected	areas and their dis-						
<ul> <li>The area</li> </ul>	occupied by rcentage of Q			as as a percentage of Qatar's total lan ecosystems are adequately represen							
<ul> <li>Budget a</li> </ul>	nd number of			qualified staff to manage each area. na populations in each area.							

- Number of visitors to each of the protected areas
- Number of facilities available for visitors at each protected area.
- Awareness of visitors regarding importance of conservation.
- VI) Please provide information on challenges in implementation of this target.

A participatory management system has yet to emerge.

VII) Please provide any other relevant information.

critical species have also been developed.

#### Box V.

Goal 2	Promote	the c	onse	rvation of species diversity							
Target 2.1	Restore, maintain, or reduce the decline of populations of species of selected taxonomic groups										
I) National target: Has a national target been established corresponding to the global target above?											
a) No	a) No										
b) Yes, the same a	b) Yes, the same as the global target X										
c) Yes, one or mo	re specific r	nation	al tar	gets have been established							
Please provide deta	ils below.										
II) National targets for specific programmes of work: If such national target(s) ha(s)(ve) been established, please indicate here, and give further details in the box(es).											
Programme of wo	ork	Yes	No	Details							
a) Agricultural			Х								
b) Inland water		X									
c) Marine and coa	stal	X									
d) Dry and subhur	mid land	X									
e) Forest		X									
f) Mountain				n/a							
III) Has the global strategies?	III) Has the global or national target been incorporated into relevant plans, programmes and strategies?										
a) No											
b) Yes, into national biodiversity strategy and action plan											
c) Yes, into sector	al strategie	s, pla	ıns an	d programmes	Х						
Please provide deta	ils below.										

The National Biodiversity Strategy and Action Plan addresses this; conservation plans for a few

IV) Please provide information on current status and trends in relation to this target.
Implementation is in progress.
V) Please provide information on indicators used in relation to this target.
Breeding success of a threatened species, for example, is one of the indicators.
VI) Please provide information on challenges in implementation of this target.
VII) Please provide any other relevant information.

Box VI.									
Targ	Target 2.2 Status of threatened species improved								
I) N	ational target: Has	a nationa	al tar	get be	en established corresponding to the g	lobal target above?			
a)	No								
b)	b) Yes, the same as the global target X								
c)	Yes, one or more	specific r	nation	nal tar	gets have been established				
Ple	ase provide detail	s below.

incorporates targets.									
IV) Please provide int	IV) Please provide information on current status and trends in relation to this target.								
Implementation is in	Implementation is in progress								
V) Please provide int	V) Please provide information on indicators used in relation to this target.								
Breeding success of critical species is a key indicator.									
VI) Please provide information on challenges in implementation of this target.									
There were technical challenges but most of these have been overcome.									
VII) Please provide any other relevant information.									
Box VII.									
Goal 3	Promote the conservation of genetic diversity								
Genetic diversity of crops, livestock, and of harvested species of trees, fish and wildlife and other valuable species conserved, and associated									
indigenous and local knowledge maintained									
I) National target: Has a national target been established corresponding to the global target above?									
a) No									
b) Yes, the same a	as the global target	X							
c) Yes, one or mo									

II) National targets for specific programmes of work: If such national target(s) ha(s)(ve) been established, please indicate here, and give further details in the box(es).

Please provide details below.

Programme of work	Yes	No	Details
a) Agricultural	x		
b) Inland water		x	
c) Marine and coastal	х		
d) Dry and subhumid land	x		
e) Forest	X		
f) Mountain			n/a

III) Has the global or national target been incorporated into relevant plans, programmes and strategies?

a)	No	
b)	Yes, into national biodiversity strategy and action plan	X
c)	Yes, into sectoral strategies, plans and programmes	

Please provide details below.

Establishing and expanding gene banks, wild plants nurseries, restoration of endangered plant species, etc are part of the program.

IV) Please provide information on current status and trends in relation to this target.

Significant progress is being made.

- V) Please provide information on indicators used in relation to this target.
- VI) Please provide information on challenges in implementation of this target.

Technical capacity is still being built.

VII) Please provide any other relevant information.

#### Box VIII.

BOX VIII.								
Goal 4	Goal 4 Promote sustainable use and consumption.							
Biodiversity-based products derived from sources that are sustainably managed, and production areas managed consistent with the conservation of biodiversity								
I) National target: Ha	s a natior	al tar	get be	en established corresponding to the g	lobal target above?			
a) No	a) No							
b) Yes, the same as the global target X								
c) Yes, one or mor	e specific	natior	al tar	gets have been established				
Please provide detai	ls below.							
				nes of work: If such national targe ive further details in the box(es).	t(s) ha(s)(ve) been			
Programme of wo	rk	Yes	No	Details				
a) Agricultural		x						
b) Inland water			X					
c) Marine and coas	tal	X

c) Yes, into sectora	al strategi	es, pla	ns an	d programmes				
Please provide detai	ls below.							
The national biodiversi	ty strateg	y and	action	n plan and the Qatar Agenda 21 addre	ess these.			
IV) Please provide info	ormation (	on cur	rent s	tatus and trends in relation to this tar	get.			
Implementation is in p								
V) Please provide info	ormation o	on ind	icators	s used in relation to this target.				
- ,			. 30 30 7 6	The second of the target				
VI) Please provide info	ormation (	on cha	illenge	es in implementation of this target.				

VII) Please provide any o	ther relevan	t infor	mation.					
Box IX.		_						
Target 4.2	Target 4.2  Unsustainable consumption, of biological resources, or that impacts upon biodiversity, reduced							
I) National target: Has a	a national ta	rget be	een established corresponding to the g	lobal target above?				
a) No								
b) Yes, the same as t	he global ta	get		Х				
c) Yes, one or more s	specific natio	nal tar	gets have been established					
Please provide details	below.							
economic development that has an important bearing on the world view of its societies does not  Provide such inhibitions on resource use. Efforts are being made to pursue the target of sustainable use of biodiversity as well as other resources, as envisaged in Qatar Agenda 21 and the national biodiversity strategy and action plan.  II) National targets for specific programmes of work: If such national target(s) ha(s)(ve) been established, please indicate here, and give further details in the box(es).								
Programme of work			Details					
a) Agricultural	Х							
b) Inland water		x						
c) Marine and coasta	I X							
d) Dry and subhumid	land X							
e) Forest	x							
f) Mountain			n/a					
III) Has the global or national target been incorporated into relevant plans, programmes and strategies?								
a) No								
b) Yes, into national	biodiversity	strateg	y and action plan					
c) Yes, into sectoral s	strategies, p	ans an	d programmes	х				
Please provide details	below.							
IV) Please provide inform	mation on cu	rrent s	tatus and trends in relation to this tar	get.				
Implementation is in pro	gress, furthe	r techi	nical manpower needs to be developed	i.				
V) Please provide information on indicators used in relation to this target.								

<ul><li>VI) Please provide information on challenges in implementation of this t</li></ul>	this targe	ıet.
--	------------	------

Creating partnership with local communities is a slow process, inadequacy of trained national manpower.

VII) Please provide any other relevant information.

Unsustainable use pattern is a relatively new phenomenon that emerged with the modern form of development. It is a challenging task to reverse this as the conventional economic systems promote rather than reduce consumption

Box X.									
Target 4.3	No species	of wild	I flora or fauna endangered by into	ernational trade					
I) National target: H	las a national ta	rget be	en established corresponding to the g	lobal target above?					
a) No	No								
b) Yes, the same	b) Yes, the same as the global target X								
c) Yes, one or mo	ore specific natio	nal tar	gets have been established						
Please provide det	ails below.								
As a Party to CITES,	international tra	ade in v	vild species is strictly controlled in the	country.					
II) National targets for specific programmes of work: If such national target(s) ha(s)(ve) been established, please indicate here, and give further details in the box(es).									
Programme of w	ork Yes	No	Details						
a) Agricultural		x							
b) Inland water		x							
c) Marine and co	astal X								
d) Dry and subhu	ımid land X								
e) Forest	Х								
f) Mountain			n/a						
III) Has the global or national target been incorporated into relevant plans, programmes and strategies?									
a) No									
b) Yes, into natio	nal biodiversity	strateg	y and action plan						
c) Yes, into secto	oral strategies, p	lans an	d programmes	x					
Please provide det	ails below.								
Trade in wildlife spec respect.	cies is strictly co	ntrolled	I and the target is included in the ope	rational plans in this					

IV) Please provide information on current status and trends in relation to this target.

Progress being achieved.

V) Please provide information on indicators used in relation to this target.
The number of export and import in wild flora and fauna in general, especially endangered species.
VI) Please provide information on challenges in implementation of this target.
Capacity has to be further enhanced.
VII) Please provide any other relevant information.

# Box XI.

Goal 5	Pressures from habitat loss, land use change and degradation, and unsustainable water use, reduced.								
Target 5.1	arget 5.1 Rate of loss and degradation of natural habitats decreased								
I) National target: Ha	) National target: Has a national target been established corresponding to the global target above?								
a) No	No								
b) Yes, the same as	b) Yes, the same as the global target X								
c) Yes, one or more specific national targets have been established									
Please provide detail	ls below.								
The National Biodiversity Strategy and Action Plan sets the target of reversing the loss of habitat loss and degradation.  II) National targets for specific programmes of work: If such national target(s) ha(s)(ve) been established, please indicate here, and give further details in the box(es).									
Programme of work Yes No Details									
a) Agricultural		х							
b) Inland water			X						
c) Marine and coastal		Х							
d) Dry and subhumid land		x							
e) Forest		x							
f) Mountain				n/a					
	r nationa	al targ	get be	een incorporated into relevant plan	s, programmes and				
strategies?	) No								
a) No	ıl biodiver	rsity sl	trategy	y and action plan	X				

The NBSAP and the sectoral plans in agriculture address this.

IV) Please provide information on current status and trends in relation to this target.

Significant reduction in the loss and degradation of habitat is observed.

V) Please provide information on indicators used in relation to this target.

Indicators in the case of rangelands, for example are as follows:

- Level of natural vegetative cover throughout the desert rangelands, particularly in the degraded and desertified areas.
- Numbers of palatable species for domestic livestock and hence the productivity level of these natural rangelands.
- Increase or decrease in the areas of protected rangelands.
- Level of cooperation from livestock herders and herd owners in the conservation of the desert rangelands.

VI) Please provide information on challenges in implementation of this target.

VII) Please provide any other relevant information.

# Box XII.

Goal 6 Control threats from invasive alien species.								
Target 6.1	Target 6.1 Pathways for major potential alien invasive species controlled

The national culture draw heavily from the rural lifestyle of the Beduin communities and their traditional knowledge is widely respected and the national development plans incorporate this recognition.  Of particular importance is the Beduins' traditional system of sustainable resource management called the Himas (protected areas). There were sites were the resources were managed with care and due protection accorded by social sanction. They have played an important role in biodiversity conservation, combating desertification and rehabilitation of rangelands, and also often served as in situ seed banks.

- The CoP should further develop this area by creating an international mechanism to facilitate technological transfers. There should be provision to network among the providers and potential recipients of technology, address impediments to such transfers and disseminate information about the kind of technologies available for transfers under the CBD provisions.

### **Global Strategy for Plant Conservation (GSPC)**

The Conference of the Parties, in decision VI/9, annex, adopted the Global Strategy for Plant Conservation. Parties and Governments are invited to develop their own targets with this flexible framework. The Conference of the Parties considered the Strategy as a pilot approach for the use of outcome oriented targets under the Convention. In decision VII/10, the Conference of the Parties decided to integrate the targets into the reporting framework for the Third National Reports. Please provide relevant information by responding to the questions and requests contained in the following tables.

#### Box XXIV.

Target 1. A widely accessible working list of known plant species, as a step towards a complete world flora.						
I) Has your country established national target corresponding to the above global ta	rget?					
a) Yes	X					
b) No						
Please specify						
Considerable works on the flora of Qatar has been done. Some of these are: Abulfatih, H.A., Abdel Bari, E.M., Alsubaey, A., and Ibrahim, Y.M. (2001). Vegetation of University of Qatar, Doha. Abdel Bari, E.M., 1999, Additions to the Flora of Qatar, Qatar University Science Journ 312. Abdel-Raziq, M.S. and Ismail, A.M.A., 1990, Vegetation Composition of a Maritime Salt Qatar, Journal of Vegetation Science, 1:85-88. Abushama, F, et. al., Biodiversity Inventory, 2002, University of Qatar, Doha. Al-Kowari, M, et. al., Wild Plants in Qatar, 2003, Higher Council for Family Affairs, Dohbic) Batanouny, Kamal, Flora in Qatar, Doha, Qatar.	nal 17(2): 303-					
Has your country incorporated the above global or national target into relevant plans, programmes and strategies?						
a) Yes	X					
b) No						
Please specify						
III) Current status (please indicate current status related to this target)						
Floristic research is being continued with focus on lesser known taxa.						
IV) Measures taken to achieve target (please indicate activities, legislative measures steps taken with a view to achieve the target)	and other					
V) Progress made towards target (please specify indicators used to monitor progress target)	s towards the					
VI) Constraints to achieving progress towards the target						
There is a need to increase the number of plant taxonomists in the country.						
VII) Any other relevant information						

Based on the Global Strategy for Plant Conservation, the Arabian Plant Specialist Group has developed an Arabian Plants Conservation Strategy, with input from Qatar.

### Box XXV.

Target 2. A preliminary assessment of the conservation status of all known plant species, at national, regional and international levels.					
I) Has your country established national target corresponding to the above global ta	rget?				
a) Yes	X				
b) No					
Please specify					
II) Has your country incorporated the above global or national target into relevant p programmes and strategies?	lans,				
a) Yes	X				
b) No					
Please specify					
III) Current status (please indicate current status related to this target)					
The assessment is in progress.

V) Progress made towards target (please specify indicators used to monitor progres target)	s towards the				
VI) Constraints to achieving progress towards the target					
VII) Any other relevant information					
A number of keystone species has been assessed, area specific assessment of several has also been done, and further assessment is in progress.	other species				

# Box XXVI.

Target 3. Development of models with protocols for plant conservation and sustainable use, based on research and practical experience.					
I) Has your country established national target corresponding to the above global ta	rget?				
a) Yes	X				
b) No					
Please specify					
II) Has your country incorporated the above global or national target into relevant p programmes and strategies?	lans,				
a) Yes	X				
b) No					
Please specify					
A network of protected areas has been established with plant conservation as an objective, and the coverage of protected areas is targeted to be significantly increased in the coming years.					
III) Current status (please indicate current status related to this target)					
There is considerable progress in implementation.					
IV) Measures taken to achieve target (please indicate activities, legislative measures steps taken with a view to achieve the target)	and other				
V) Progress made towards target (please specify indicators used to monitor progres target)	s towards the				
VI) Constraints to achieving progress towards the target					
Releasing areas for conservation purpose involves a complex process, often because of the community interests involved.					
VII) Any other relevant information					

### Box XXVII.

Target 4. At least ten percent of each of the world's ecological regions effectively conserved.		
I) Has your country established national target corresponding to the above glo	bal target?	
a) Yes	X	
b) No		
Please specify		
The National Biodiversity Strategy and Action Plan aims to have 17 per cent of t protected.	he land area	
II) Has your country incorporated the above global or national target into releven programmes and strategies?	vant plans,	
a) Yes	X	
b) No		
Please specify		
NBSAP.		
III) Current status (please indicate current status related to this target)		
Progress is being achieved in implementation.		
IV) Measures taken to achieve target (please indicate activities, legislative measures taken with a view to achieve the target)	asures and other	
The Law Establishing the Supreme Council for the Environment and Natural Reserves provides the basis for the establishment of protected areas. Scheduled expansion of area of conservation management includes the designation of two biosphere reserves.		
V) Progress made towards target (please specify indicators used to monitor protection the target)	ogress towards	
Six sites have been declared as protected areas and two much larger sites are in the pipeline to be designated as biosphere reserves.		
VI) Constraints to achieving progress towards the target		
Building effective partnership with the local communities is a long term process, and their partnership is crucial to the success of the conservation project.		
VII) Any other relevant information		

### Box XXVIII.

Target 5. Protection of fifty percent of the most important areas for plant diversity assured.			
Has your country established national target corresponding to the above global target?			
a) Yes	X		
b) No			
Please specify			
The proposed expansion of protected areas will cover this.			
II) Has your country incorporated the above global or national target into relevant plans, programmes and strategies?			
a) Yes	Х		
b) No			
Please specify			
III) Current status (please indicate current status related to this target)

VII) Any other relevant information			

#### Box XL.

a) No

Please elaborate below on the implementation of this strategy specifically focusing on:

- a) outcomes and impacts of actions taken;
- b) contribution to the achievement of the goals of the Strategic Plan of the Convention;
- c) contribution to progress towards the 2010 target;

guidance contained in the annex to decision V/6? (decision V/6)

- d) progress in implementing national biodiversity strategies and action plans;
- e) contribution to the achievement of the Millennium Development Goals;
- f) constraints encountered in implementation.

Plant conservation works are central to the biodiversity management in Qatar. The selection of sites for protected area has been made using plant diversity as a criteria. The activities undertaken so far have created a positive impact and there are clear signs of reversal of the trend of degradation, making this a contribution in achieving the 2010 target.

### **Ecosystem Approach**

The ecosystem approach is a strategy for the integrated management of land, water and living resources that promotes conservation and sustainable use in an equitable way. Application of the ecosystem approach will help to reach a balance of the three objectives of the Convention. At its second meeting, the Conference of the Parties has affirmed that the ecosystem approach is the primary framework for action under the Convention (decision II/8). The Conference of the Parties, at its fifth meeting, endorsed the description of the ecosystem approach and operational guidance and recommended the application of the principles and other guidance on the ecosystem approach. The seventh meeting of the Conference of the Parties agreed that the priority at this time should be facilitating implementation of the ecosystem approach. Please provide relevant information by responding to the following questions.

b) No, but application is under consideration			
c) Yes, some aspects are being applied	X		
d) Yes, substantially implemented			
<b>4.</b> Solution Is your country developing practical expressions of the ecosystem approach for national policies and legislation and for implementation activities, with adaptation to local, national, and regional conditions? (decision V/6)			
a) No			
b) No, but development is under consideration			
<ul> <li>Yes, practical expressions have been developed for applying some principles of the ecosystem approach</li> </ul>	X		
<ul> <li>d) Yes, practical expressions have been developed for applying most principles of the ecosystem approach</li> </ul>			

¹ Please note that all the questions marked with ♠ have been previously covered in the second national reports and some thematic reports.

<b>5.</b> Is your country strengthening capacities for the application of the ecosystem approach, and providing technical and financial support for capacity-building to apply the ecosystem approach? (decision V/6)			
a) No			
b) Yes, within the country	Х		
c) Yes, including providing support to other Parties			
6.	tem approach across		
a) No			
b) Yes, informal cooperation (please provide details below)			
c) Yes, formal cooperation (please provide details below)	Х		
Further comments on regional cooperation in applying the ecosystem approborders.	oach across national		
Such regional cooperation is promoted through bodies such as the Gulf Cooperat Convention for the Protection of Wildlife and its Habitats, Regional Organisation the Marine Environment, etc.			
	<b>7.</b> Is your country facilitating the exchange of experiences, capacity building, technology transfer and awareness raising to assist with the implementation of the ecosystem approach? (decisions VI/12 and VII/11)		
a) No			
b) No, some programmes are under development			
c) Yes, some programmes are being implemented (please provide details below)	X		
d) Yes, comprehensive programmes are being implemented (please provide details below)			
Further comments on facilitating the exchange of experiences, capacity building, technology transfer and awareness raising to assist with the implementation of the ecosystem approach.			
This is done through the platforms of various regional forums.			
<b>8.</b> Is your country creating an enabling environment for the implementation of the ecosystem approach, including through development of appropriate institutional frameworks? (decision VII/11)			
a) No			
b) No, but relevant policies and programmes are under development			
c) Yes, some policies and programmes are in place (please provide details below)	X		
d) Yes, comprehensive policies and programmes are in place (please provide details below)			
Further comments on the creation of an enabling environment for the implementation of the ecosystem approach.			

### **C. ARTICLES OF THE CONVENTION**

# **Article 5 - Cooperation**

**9.** So Is your country actively cooperating with other Parties in respect of areas beyond national jurisdiction for the conservation and sustainable use of biological diversity?

a) No			
b) Yes, bilateral cooperation (please give details below)			
c) Yes, multilateral cooperation (please give details below)	X		
d) Yes, regional and/or subregional cooperation (please give details below)			
e) Yes, other forms of cooperation (please give details below)			
Further comments on cooperation with other Parties in respect of areas beyond for the conservation and sustainable use of biodiversity.	d national jurisdiction		
Qatar actively supports the formation of multilateral mechanism for the sustainable management of biodiversity beyond national jurisdiction.			
<b>10.</b> Is your country working with other Parties to develop regional, subremechanisms and networks to support implementation of the Convention? (decisi			
mechanisms and networks to support implementation of the Convention? (decisi			
mechanisms and networks to support implementation of the Convention? (decisi a) No			
mechanisms and networks to support implementation of the Convention? (decisi  a) No  b) No, but consultations are under way  c) Yes, some mechanisms and networks have been established (please			
mechanisms and networks to support implementation of the Convention? (decisi  a) No  b) No, but consultations are under way  c) Yes, some mechanisms and networks have been established (please provide details below)  d) Yes, existing mechanisms have been strengthened (please provide	on VI/27 A)		

**11.** Is your country taking steps to harmonize national policies and programmes, with a view to optimizing policy coherence, synergies and efficiency in the implementation of various multilateral environment agreements (MEAs) and relevant regional initiatives at the national level? (decision VI/20)

a) No	
b) No, but steps are under consideration	
c) Yes, some steps are being taken (please specify below)	X
d) Yes, comprehensive steps are being taken (please specify below)	

Further comments on the harmonization of policies and programmes at the national level.

In addition to the CBD, Qatar is a Party to the following MEAs, and synergies are sought and disjunctions avoided at the institutional level in the national implementation of the same:

Convention Concerning the Protection of the World's Cultural and Natural Heritage

Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES)

Convention on Combating Desertification (UNCCD)

Convention for the Protection of the Ozone Layer (Vienna Convention)

Basel Convention on the Control of Transboundary Movements of Hazardous Wastes

The Kuwait Regional Convention for Cooperation on Protection of the Marine Environment from Pollution

Convention on the Conservation of Wildlife and Natural Habitats in the Countries of the Gulf Cooperation Council

### Box XLI.

Please elaborate below on the implementation of this strategy specifically focusing on:

- a) outcomes and impacts of actions taken;
- b) contribution to the achievement of the goals of the Strategic Plan of the Convention;
- c) contribution to progress towards the 2010 target;
- d) progress in implementing national biodiversity strategies and action plans;
- e) contribution to the achievement of the Millennium Development Goals;
- f) constraints encountered in implementation.

The ecosystem approach complements the doctrine of the traditional Hema system practiced in a good part of the rangelands of the country. Because of its integrated approach it finds acceptance at various levels. The activities in this regard has helped advance the country towards the 2010 target and it also marks as a contribution in improving rural livelihood, thus enhancing the implementation of MDGs.

# **Article 6 - General measures for conservation and sustainable use**

<b>12.</b> Has your country put in place effective national strategies, plans and programmes to provide a national framework for implementing the three objectives of the Convention? (Goal 3.1 of the Strategic Plan)			
a) No			
<ul> <li>No, but relevant strategies, plans and programmes are under development</li> </ul>			
<ul> <li>Yes, some strategies, plans and programmes are in place (please provide details below)</li> </ul>			
<ul> <li>d) Yes, comprehensive strategies, plans and programmes are in place (please provide details below)</li> </ul>	х		
Further comments on the strategies, plans and programmes for implementing th the Convention.	e three objectives of		
Strategies and plans for biodiversity conservation and management, terrestrial environmental awareness building are being pursued, and all these have the conservation and sustainable use of biodiversity.			
<b>13.</b> ⚠ Has your country set measurable targets within its national strategie (decisions II/7 and III/9)	s and action plans?		
a) No			
b) No, measurable targets are still in early stages of development			
c) No, but measurable targets are in advanced stages of development			
d) Yes, relevant targets are in place (please provide details below)	X		
e) Yes, reports on implementation of relevant targets available (please provide details below)			
Further comments on targets set within national biodiversity strategies and action	n plans.		
<b>14.</b> Has your country identified priority actions in its national biodiversity strategy and action plan? (decision VI/27 A)			
a) No			
b) No, but priority actions are being identified			
c) Yes, priority actions identified (please provide details below)	X		
Further comments on priority actions identified in the national biodiversity strategy and action plan.			
The NBSAP has identified priority actions in eleven areas, namely: Protected areas development, Eotourism development,			
Marine and coastal environment, Rangelands and desertification,			
Agrobiodiversity,			
Environmental legislation			

Scientific research,
Environmental awareness building,
Invasive species and biosafety,
Environmental monitoring and EIA,
And Multilateral environmental agreements.

since 2000

benefit sharing into relevant sectoral or cross-sectoral plans, programmes and policies? (decision VI/27 A)			
a) No			
b) Yes, in some sectors (please provide det	ails below)		
c) Yes, in major sectors (please provide de	tails below)	Х	
d) Yes, in all sectors (please provide details	below)		
Further information on integration of the con benefit-sharing into relevant sectoral or cross-se			
<b>16.</b> Are migratory species and their habitats strategy or action plan (NBSAP)? (decision VI/20		national biodiversity	
a) Yes		X	
b) No			
I) If <b>YES</b> , please briefly describe the extent to	which it addresses		
(a) Conservation, sustainable use and/or restoration of migratory species	Migratory waterfowl, birds o turtles are protected from hunt		
(b) Conservation, sustainable use and/or restoration of migratory species' habitats, including protected areas	Nesting sites of marine turtles are protected		
(c) Minimizing or eliminating barriers or obstacles to migration	Migrating marine turtles and wintering waterfowl are accorded protection. Nesting sites of turtles are protection from perturbations.		
(d) Research and monitoring for migratory species	Research on migratory birds SCENR.	is carried out by	
(e) Transboundary movement	Transboundary cooperation in this respect is sought through the Convention on the Conservation of Wildlife and Natural Habitats in the Countries of the Gulf Cooperation Council, to which Qatar is a party.		
II) If <b>NO</b> , please briefly indicate below			
(a) The extent to which your country addresses migratory species at national level			
(b) Cooperation with other Range States			

### **Biodiversity and Climate Change**

17. Has your country implemented projects aimed at mitigating and adapting to climate change that incorporate biodiversity conservation and sustainable use? (decision VII/15)		
a) No		
b) No, but some projects or programs are under development		
c) Yes, some projects have been implemented (please provide details below)	X	
Further comments on the projects aimed at mitigating and adapting to climate change that incorporate biodiversity conservation and sustainable use.		
An important program is the massive tree planting project of the Ministry of Municipal Affairs and Agriculture.		

<b>18.</b> Has your country facilitated coordination to ensure that climate change mitigation and adaptation projects are in line with commitments made under the United Nations Framework Convention on Climate Change and the United Nations Convention to Combat Desertification? (decision VII/15)		
a) No		
b) No, but relevant mechanisms are under development	X	
c) Yes, relevant mechanisms are in place (please provide details below)		
Further comments on the coordination to ensure that climate change mitigation and adaptation projects are in line with commitments made under the UNFCCC and the UNCCD.		

#### Box XLII.

Please elaborate below on the implementation of this article and associated decisions specifically focusing on:

- a) outcomes and impacts of actions taken;
- b) contribution to the achievement of the goals of the Strategic Plan of the Convention;
- c) contribution to progress towards the 2010 target;
- d) progress in implementing national biodiversity strategies and action plans;
- e) contribution to the achievement of the Millennium Development Goals;
- f) constraints encountered in implementation.

The conservation measures undertaken have caused a significant improvement in the biodiversity of the country. A firm institutional base for biodiversity management has been created and streamlined. Further implementation of the national biodiversity strategy and action plan is expected to significantly reduce the loss of biodiversity and institute a reverse trend.

# Article 7 - Identification and monitoring

<b>19.</b> ♦ On Article 7(a), does your country have an ongoing programme to identify components of biological diversity at the genetic, species, ecosystem level?		
a) No		
<ul> <li>Yes, selected/partial programmes at the genetic, species and/or ecosystem level only (please specify and provide details below)</li> </ul>		
<ul> <li>Yes, complete programmes at ecosystem level and selected/partial inventories at the genetic and/or species level (please specify and provide details below)</li> </ul>	X	
Further comments on ongoing programmes to identify components of biodive species and ecosystem level.	ersity at the genetic,	
Documenting biodiversity is an ongoing process.		
20. ♠ On Article 7(b), which components of biological diversity identified in according to the Convention, have ongoing, systematic monitoring programmes?	cordance with Annex I	
a) at ecosystem level (please provide percentage based on area covered)	About 30	
<ul> <li>b) at species level (please provide number of species per taxonomic group and percentage of total known number of species in each group)</li> </ul>	About 25% species of mammals, birds and reptiles.	
c) at genetic level (please indicate number and focus of monitoring programmes )	Advances are still being made in this area.	
Further comments on ongoing monitoring programmes at the genetic, species a	nd ecosystem level.	
<b>21.</b> ♦ On Article 7(c), does your country have ongoing, systematic monitoring of the following key threats to biodiversity?	programmes on any	
a) No		
b) Yes, invasive alien species (please provide details below)	X	
c) Yes, climate change (please provide details below)	Х	
d) Yes, pollution/eutrophication (please provide details below)	X	
e) Yes, land use change/land degradation (please provide details below)	X	
f) Yes, overexploitation or unsustainable use (please provide details below)	Х	
Further comments on monitoring programmes on key threats to biodiversity.		
Monitoring programs exists for both the terrestrial and marine biomes.		

<b>22.</b> On Article 7 (d), does your country have a mechanism to maintain and organize data derived from inventories and monitoring programmes and coordinate information collection and management at the national level?			
a)	No		
b)	No, but some mechanisms or systems are being considered		
c)	Yes, some mechanisms or systems are being established		
d)	Yes, some mechanisms or systems are in place (please provide details below)	X	
e)	Yes, a relatively complete system is in place (please provide details below)		
Further information on the coordination of data and information collection and management.			

	<b>23.</b>	Does your country use indicators for national-level monitoring of bi	iodiversity? (decision
	a)	No	
	b)	No, but identification of potential indicators is under way (please describe)	
	c)	Yes, some indicators identified and in use (please describe and, if available, provide website address, where data are summarized and presented)	X
	d)	Yes, a relatively complete set of indicators identified and in use (please describe and, if available, provide website address, where data are summarized and presented	
Γ			

Further comments on the indicators identified and in use.

Indicators for PA area management have also been mentioned earlier; indicators for some critical species have been developed; indicators for the marine and coastal ecosystems are also available.

### Box XLIII.

Please elaborate below on the implementation of this article and associated decisions specifically focusing on:

- a) outcomes and impacts of actions taken;
- b) contribution to the achievement of the goals of the Strategic Plan of the Convention;
- c) contribution to progress towards the 2010 target;
- d) progress in implementing national biodiversity strategies and action plans;
- e) contribution to the achievement of the Millennium Development Goals;
- f) constraints encountered in implementation.

Identification and monitoring is being stepped up and this is expected to expand the base of the biodiversity inventory and help to make improvements in the conservation programs.

# **Decisions on Taxonomy**

24. ♦ Has your country developed a plan to implement the suggested actions a IV/1? (decision IV/1)	s annexed to decision	
a) No		
b) No, but a plan is under development	X	
c) Yes, a plan is in place (please provide details below)		
d) Yes, reports on implementation available (please provide details below)		
Further information on a plan to implement the suggested actions as annexed to	decision IV/1.	
<b>25.</b> ✓ Is your country investing on a long-term basis in the developed infrastructure for your national taxonomic collections? (decision IV/1)	ment of appropriate	
a) No		
b) Yes (please provide details below)	X	
Further information on investment on a long-term basis in the develop infrastructure for your national taxonomic collections.	ment of appropriate	
Capacity building in taxonomy is being enhanced.		
<b>26.</b> Ones your country provide training programmes in taxonomy and work to of taxonomic research? (decision IV/1)	increase its capacity	
a) No		
b) Yes (please provide details below)	X	
Further information on training programmes in taxonomy and efforts to increase taxonomic research.	rease the capacity of	
SCENR, Ministry of Municipal Affairs and Agriculture and the Universities promot	e taxonomic training.	

27. Has your country taken steps to ensure that institutions responsible for inventories and taxonomic activities are financially and administratively stab	
a) No	
b) No, but steps are being considered	
c) Yes, for some institutions	Х
d) Yes, for all major institutions	
<b>28.*</b> <sup>2</sup> Is your country collaborating with the existing regional, subregional a partnerships and institutions in carrying out the programme of work, including taxonomic needs and identifying regional-level priorities? (decision VI/8)	
a) No	
b) No, but collaborative programmes are under development	
<ul> <li>Yes, some collaborative programmes are being implemented (please provide details about collaborative programmes, including results of regional needs assessments)</li> </ul>	X
<ul> <li>d) Yes, comprehensive collaborative programmes are being implemented (please provide details about collaborative programmes, including results of regional needs assessment and priority identification)</li> </ul>	
Further information on the collaboration your country is carrying out to impleme work for the GTI, including regional needs assessment and priority identification	
Of particular importance in this respect is the Arabian Plant Specialist Group.	
29. * Has your country made an assessment of taxonomic needs and capacitie	s at the national level
for the implementation of the Convention? (annex to decision VI/8)	
a) No	
<ul> <li>Yes, basic assessment made (please provide below a list of needs and capacities identified)</li> </ul>	x
<ul> <li>Yes, thorough assessment made (please provide below a list of needs and capacities identified)</li> </ul>	
Further comments on national assessment of taxonomic needs and capacities.	
A general assessment has been made and this has identified the need for more specializing in the invertebrate fauna and microbes.	e trained taxonomists
30. * Is your country working on regional or global capacity building to su	pport access to, and

 $<sup>^2</sup>$  The questions marked with \* in this section on Taxonomy are similar to some questions contained in the format for a report on the implementation of the programme of work on the Global Taxonomy Initiative. Those countries that have submitted such a report do not need to answer these questions unless they have updated information to provide.

generation of, taxonomic information in collaboration with other Parties? (annex to decision VI/8)				
a) No				
b) Yes, relevant programmes are under development				
<ul> <li>r) Yes, some activities are being undertaken for this purpose (please provide details below)</li> </ul>	X			
d) Yes, many activities are being undertaken for this purpose (please provide details below)				

Further comments on regional or global capacity-building to support access to, and generation of, taxonomic information in collaboration with other Parties.

As mentioned earlier the Arabian Plant Specialist Group serves such a purpose, and plant scientists from Qatar are active in this network. Similar networks to promote the taxonomy of animal taxa have to emerge.

**31.** \* Has your country developed taxonomic support for the implementation of the programmes of work under the Convention as called upon in decision VI/8? (annex to decision VI/8)

a) No	
b) Yes, for forest biodiversity (please provide details below)	X
c) Yes, for marine and coastal biodiversity (please provide details below)	X
d) Yes, for dry and sub-humid lands (please provide details below)	X
e) Yes, for inland waters biodiversity (please provide details below)	X
f) Yes, for mountain biodiversity (please provide details below)	
g) Yes, for protected areas (please provide details below)	X
h) Yes, for agricultural biodiversity (please provide details below)	X
i) Yes, for island biodiversity (please provide details below)	

Further comments on the development of taxonomic support for the implementation of the programmes of work under the Convention.

While existing capacity is invested in these areas, there is a critical need to strengthen the taxonomic capacity further, and this is being attempted.

<b>32.</b> * Has your country developed taxonomic support for the implementation of the cross-cutting issues under the Convention as called upon in decision VI/8?				
a) No				
b) Yes, for access and benefit-sharing (please provide details below)	X			
c) Yes, for Article 8(j) (please provide details below)	X			
d) Yes, for the ecosystem approach (please provide details below)	X			
<ul> <li>e) Yes, for impact assessment, monitoring and indicators (please provide details below)</li> </ul>	X			
f) Yes, for invasive alien species (please provide details below)	X			
g) Yes, for others (please provide details below)				
Further comments on the development of taxonomic support for the implementation of the cross-cutting issues under the Convention.				
Taxonomic capacity is being strengthened.				

# Article 8 - *In-situ* conservation [excluding paragraphs (a) to (e), (h) and (j)]

[excluding paragraphs (a) to (e), (ii) and (j)]					
<b>33.</b> On Article 8(i), has your country endeavored to provide the conditions needed for compatibility between present uses and the conservation of biological diversity and sustainable use of its components?					
a) No					
b) No, but potential measures are being identified					
c) Yes, some measures undertaken (please provide details below)					
d) Yes, comprehensive measures undertaken (please provide details below)	X				
Further comments on the measures taken to provide the conditions needed for compatibility between present uses and the conservation of biological diversity and sustainable use of its components.					
This is the basic principle of the conservation and development work in the country.					

<b>34.</b> ○ On Article 8(k), has your country developed or maintained the necessary legislation and/or other regulatory provisions for the protection of threatened species and populations?					
a) No					
b) No, but legislation is being developed					
c) Yes, legislation or other measures are in place (please provide details below)	X				

Further information on the legislation and/or regulations for the protection of threatened species and populations.

The Constitution of Qatar affirms that the State shall conserve the environment and its natural balance for the comprehensive and sustainable use of its resources for all generations (Article 33) The key laws in this respect are the following:

Law No. 32 (1995) Regarding Prevention of Damaging Plant Environment and Its Contents

Decree Law No. 11 (2000) Establishing the Supreme Council for the Environment and Natural Reserves (SCENR)

Law No. 4 (2002) Organization of Wild Animals, Birds and Reptiles Hunting

Law No. 4 (1983) Regarding the Exploitation and Protection of Living Marine Resources in Qatar.

In addition, a law on international trade in endangered species is enacted.

35.	<b>♦</b>	On A	rticl	e 8(I),	does	your	country	regulate	or	manage	processes	and	categories	of	activities
ident	ifie	d und	der A	Article	7 as l	naving	signific	ant adver	se	effects o	n biologica	I div	ersity?		

a) No	
b) No, but relevant processes and categories of activities being identified	
c) Yes, to a limited extent (please provide details below)	
d) Yes, to a significant extent (please provide details below)	X

Further comments on the regulation or management of the processes and categories of activities identified by Article 7 as having significant adverse effects on biodiversity.

This is a cross cutting concern for all development activities in the country.

### Box XLIV.

Please elaborate below on the implementation of this article and associated decisions specifically focusing on:

- a) outcomes and impacts of actions taken;
- b) contribution to the achievement of the goals of the Strategic Plan of the Convention;
- c) contribution to progress towards the 2010 target;
- d) progress in implementing national biodiversity strategies and action plans;
- e) contribution to the achievement of the Millennium Development Goals;
- f) constraints encountered in implementation

Some of the threatened species are recovering their populations due to the in situ conservation measures undertaken.

# Programme of Work on Protected Areas (Article 8 (a) to (e))

<b>36.</b> Has your country established suitable time bound and measurable national-level protected areas targets and indicators? (decision VII/28)							
a) No (please specify reasons)							
b) No, but relevant work is under way							
<ul> <li>Yes, some targets and indicators established (please provide details below)</li> </ul>							
<ul> <li>d) Yes, comprehensive targets and indicators established (please provide details below)</li> </ul>	X						
Further comments on targets and indicators for protected areas.							
As mentioned before the country aims to bring upto 17 per cent of the land at The indicators used are the following:							
<ul> <li>Number of officially recognized (terrestrial, marine and coastal) protected tribution.</li> <li>The area occupied by protected areas as a percentage of Qatar's total lar</li> <li>What percentage of Qatar's major ecosystems are adequately represer area system.</li> <li>Budget and number of trained and qualified staff to manage each area.</li> <li>Number and health of flora and fauna populations in each area.</li> <li>Number of visitors to each of the protected areas</li> <li>Number of facilities available for visitors at each protected area.</li> <li>Awareness of visitors regarding importance of conservation.</li> </ul>	nd and marine area.						
<b>37.</b> Has your country taken action to establish or expand protected areas in a unfragmented natural area or areas under high threat, including securing							
(decision VII/28)							
a) No							
b) No, but relevant programmes are under development							
c) Yes, limited actions taken (please provide details below) X							
d) Yes, significant actions taken (please provide details below)							
Further comments on actions taken to establish or expand protected areas.							
The network of protected areas comprised of 6 sites and is expanded to cover 22% of the total area of the country.							

38. Has your country taken any action to address the under representation of marine and inland water ecosystems in the existing national or regional systems of protected areas? (decision VII/28)  a) No b) Not applicable c) No, but relevant actions are being considered d) Yes, limited actions taken (please provide details below)  Further comments on actions taken (please provide details below)  Further comments on actions taken to address the under representation of marine and inland water ecosystems in the existing national or regional systems of protected areas.  Two of the protected areas are marine sites.  39. Has your country identified and implemented practical steps for improving the integration of protected areas into broader land and seascapes, including policy, planning and other measures? (decision VII/28)  a) No b) No, but some programmes are under development  c) Yes, some steps identified and implemented (please provide details below)  d) Yes, many steps identified and implemented (please provide details below)  Further comments on practical steps for improving integration of protected areas into broader land and seascapes, including policy, planning and other measures.  40. Is your country applying environmental impact assessment guidelines to projects or plans for evaluating effects on protected areas? (decision VII/28)  a) No b) No, but relevant EIA guidelines are under development c) Yes, EIA guidelines are applied to some projects or plans (please provide details below)  d) Yes, EIA guidelines are applied to all relevant projects or plans (please provide details below)  Further comments on application of environmental impact assessment guidelines to projects or plans for evaluating effects on protected areas.  EIA is required for most types of development projects, a new legislation is in the pipeline to make it legally mandatory.				
b) Not applicable c) No, but relevant actions are being considered d) Yes, limited actions taken (please provide details below) Eurther comments on actions taken (please provide details below)  Further comments on actions taken to address the under representation of marine and inland water ecosystems in the existing national or regional systems of protected areas.  Two of the protected areas are marine sites.  39. Has your country identified and implemented practical steps for improving the integration of protected areas into broader land and seascapes, including policy, planning and other measures? (decision VII/28)  a) No b) No, but some programmes are under development c) Yes, some steps identified and implemented (please provide details below)  d) Yes, many steps identified and implemented (please provide details below)  Further comments on practical steps for improving integration of protected areas into broader land and seascapes, including policy, planning and other measures.  40. Is your country applying environmental impact assessment guidelines to projects or plans for evaluating effects on protected areas? (decision VII/28)  a) No b) No, but relevant EIA guidelines are under development c) Yes, EIA guidelines are applied to some projects or plans (please provide details below)  40. Yes, EIA guidelines are applied to all relevant projects or plans (please provide details below)  Further comments on application of environmental impact assessment guidelines to projects or plans for evaluating effects on protected areas.  EIA is required for most types of development projects, a new legislation is in the pipeline to make it				
c) No, but relevant actions are being considered d) Yes, limited actions taken (please provide details below) e) Yes, significant actions taken (please provide details below)  Further comments on actions taken to address the under representation of marine and inland water ecosystems in the existing national or regional systems of protected areas.  Two of the protected areas are marine sites.  39. Has your country identified and implemented practical steps for improving the integration of protected areas into broader land and seascapes, including policy, planning and other measures? (decision VII/28)  a) No b) No, but some programmes are under development c) Yes, some steps identified and implemented (please provide details below)  d) Yes, many steps identified and implemented (please provide details below)  Further comments on practical steps for improving integration of protected areas into broader land and seascapes, including policy, planning and other measures.  40. Is your country applying environmental impact assessment guidelines to projects or plans for evaluating effects on protected areas? (decision VII/28)  a) No b) No, but relevant EIA guidelines are under development c) Yes, EIA guidelines are applied to some projects or plans (please provide details below)  4) Yes, EIA guidelines are applied to all relevant projects or plans (please provide details below)  Further comments on application of environmental impact assessment guidelines to projects or plans for evaluating effects on protected areas.  EIA is required for most types of development projects, a new legislation is in the pipeline to make it	a) No			
d) Yes, limited actions taken (please provide details below) e) Yes, significant actions taken (please provide details below)  Further comments on actions taken to address the under representation of marine and inland water ecosystems in the existing national or regional systems of protected areas.  Two of the protected areas are marine sites.  39. Has your country identified and implemented practical steps for improving the integration of protected areas into broader land and seascapes, including policy, planning and other measures? (decision VII/28)  a) No b) No, but some programmes are under development c) Yes, some steps identified and implemented (please provide details below)  d) Yes, many steps identified and implemented (please provide details below)  Further comments on practical steps for improving integration of protected areas into broader land and seascapes, including policy, planning and other measures.  40. Is your country applying environmental impact assessment guidelines to projects or plans for evaluating effects on protected areas? (decision VII/28)  a) No b) No, but relevant EIA guidelines are under development c) Yes, EIA guidelines are applied to some projects or plans (please provide details below)  d) Yes, EIA guidelines are applied to all relevant projects or plans (please provide details below)  EIA is required for most types of development projects, a new legislation is in the pipeline to make it	b) Not applicable			
e) Yes, significant actions taken (please provide details below)  Further comments on actions taken to address the under representation of marine and inland water ecosystems in the existing national or regional systems of protected areas.  Two of the protected areas are marine sites.  39. Has your country identified and implemented practical steps for improving the integration of protected areas into broader land and seascapes, including policy, planning and other measures? (decision VII/28)  a) No b) No, but some programmes are under development c) Yes, some steps identified and implemented (please provide details below) d) Yes, many steps identified and implemented (please provide details below)  Further comments on practical steps for improving integration of protected areas into broader land and seascapes, including policy, planning and other measures.  40. Is your country applying environmental impact assessment guidelines to projects or plans for evaluating effects on protected areas? (decision VII/28)  a) No b) No, but relevant EIA guidelines are under development c) Yes, EIA guidelines are applied to some projects or plans (please provide details below)  d) Yes, EIA guidelines are applied to all relevant projects or plans (please provide details below)  EIA is required for most types of development projects, a new legislation is in the pipeline to make it	c) No, but relevant actions are being considered

<b>41.</b> Has your country identified legislative and institutional gaps and barriers t establishment and management of protected areas? (decision VII/28)	hat impede effective
a) No	
b) No, but relevant work is under way	
c) Yes, some gaps and barriers identified (please provide details below))	X
d) Yes, many gaps and barriers identified (please provide details below)	
Further comments on identification of legislative and institutional gaps and be effective establishment and management of protected areas.	parriers that impede
Expansion of the network and management capacity strengthening are important	needs.
<b>42.</b> Has your country undertaken national protected-area capacity needs established capacity building programmes? (decision VII/28)	assessments and
a) No	
b) No, but assessments are under way	
c) Yes, a basic assessment undertaken and some programmes established (please provide details below)	Х
d) Yes, a thorough assessment undertaken and comprehensive programmes established (please provide details below)	
Further comments on protected-area capacity needs assessment and establ building programmes.	ishment of capacity
Strengthening of technical capacity is a priority need.	
<b>43.</b> Is your country implementing country-level sustainable financing plans the systems of protected areas? (decision VII/28)	nat support national
a) No	
b) No, but relevant plan is under development	
c) Yes, relevant plan is in place (please provide details below)	Х
d) Yes, relevant plan is being implemented (please provide details below)	
Further comments on implementation of country-level sustainable financing national systems of protected areas.	plans that support
The protected areas are State funded. Though there are constraints they are surr	mountable.
<b>44.</b> Is your country implementing appropriate methods, standards, criteria evaluating the effectiveness of protected areas management and governance? (d	
a) No	
b) No, but relevant methods, standards, criteria and indicators are under development	
c) Yes, some national methods, standards, criteria and indicators	X

d) Yes, some national methods, standards, criteria and indicators developed and in use and some international methods, standards, criteria and indicators in use (please provide details below)

Further comments on methods, standards, criteria and indicators for evaluating the effectiveness of protected areas management and governance.

The criteria set by the World Commission on Protected Areas are often used.

#### Box XLV.

Please elaborate below on the implementation of this article and associated decisions specifically focusing on:

- a) outcomes and impacts of actions taken;
- b) contribution to the achievement of the goals of the Strategic Plan of the Convention;
- c) contribution to progress towards the 2010 target;
- d) progress in implementing national biodiversity strategies and action plans;
- e) contribution to the achievement of the Millennium Development Goals;
- f) constraints encountered in implementation.

The protected area development has significantly improved biodiversity conservation in Qatar and it is expected to further improve the biodiversity status with the proposed expansion of protected areas.

### Article 8(h) - Alien species

<b>45.</b> Has your country identified alien species introduced into its territory and established a system for tracking the introduction of alien species?	
a) No	
<ul> <li>b) Yes, some alien species identified but a tracking system not yet established</li> </ul>	
c) Yes, some alien species identified and tracking system in place	X
<ul> <li>d) Yes, alien species of major concern identified and tracking system in place</li> </ul>	
<b>46.</b> ✓ Has your country assessed the risks posed to ecosystems, habitat introduction of these alien species?	s or species by the
a) No

- c) contribution to progress towards the 2010 target;
- d) progress in implementing national biodiversity strategies and action plans;
- e) contribution to the achievement of the Millennium Development Goals;
- f) constraints encountered in implementation.

The threat of invasives is expected to substantially go down with the quarantine measures introduced and the increasing attention paid on the prevention of introduction of exotic marine organisms through the discharged ballast waters of ships; efforts at physical removal of invasives could eventually eliminate the menace of invasives. Substantial progress in this respect could be achieved by 2010.

## Article 8(j) - Traditional knowledge and related provisions

### **GURTS**

<b>57.</b> Has your country created and developed capacity-building programmes to smallholder farmers, indigenous and local communities, and other relevant stakel participate in decision-making processes related to genetic use restriction technol	nolders to effectively
a) No	
b) No, but some programmes are under development	X
c) Yes, some programmes are in place (please provide details below)	
<ul> <li>d) Yes, comprehensive programmes are in place (please provide details below)</li> </ul>	
Further comments on capacity-building programmes to involve and enable sindigenous and local communities and other relevant stakeholders to effect decision-making processes related to GURTs.	
This in the early stages of development.	

### **Status and Trends**

a)	ous and local communities? (decision VII/16)  No	Х
b)	No, but support to relevant studies is being considered	
c)		
	r information on the studies undertaken to determine the status, trends ar owledge, innovations and practices of indigenous and local communities,	
	Akwé:Kon Guidelines	
enviror	s your country initiated a legal and institutional review of matters imental and social impact assessment, with a view to incorporating the Ational legislation, policies, and procedures?	
a)	No	
b)	No, but review is under way	Х
c)	Yes, a review undertaken (please provide details on the review)	
Further	r information on the review.	
	be noted that the cultural ethos of the local communities has a profour's cultural and social values.	nd influence on t
	s your country used the Akwé:Kon Guidelines in any project proposed to t nd/or land and waters traditionally occupied by indigenous and local com )	
	No	
a)	No, but a review of the Akwé: Kon guidelines is under way	Х
a) b)		
	Yes, to some extent (please provide details below)	
b)	Yes, to some extent (please provide details below)  Yes, to a significant extent (please provide details below)	

## **Capacity Building and Participation of Indigenous and Local Communities**

<b>61.</b> Has your country undertaken any measures to enhance and strengthen the capacity of indigenous and local communities to be effectively involved in decision-making related to the use of their traditional knowledge, innovations and practices relevant to the conservation and sustainable use of biodiversity? (decision V/16)		
a) No		
b) No, but some programmes being developed		
c) Yes, some measures taken (please provide details below)	X	
d) Yes, comprehensive measures taken (please provide details below)		
Further information on the measures to enhance and strengthen the capacity of communities.	indigenous and local	
<b>62.</b> Has your country developed appropriate mechanisms, guidelines, legislation or other initiatives to foster and promote the effective participation of indigenous and local communities in decision making, policy planning and development and implementation of the conservation and sustainable use of biodiversity at international, regional, subregional, national and local levels? (decision V/16)		
a) No		
b) No, but relevant mechanisms, guidelines and legislation are under development	X	
<ul> <li>c) Yes, some mechanisms, guidelines and legislation are in place (please provide details below)</li> </ul>		
Further information on the mechanisms, guidelines and legislation developed.		
In the development of protected areas and reintroduction of endangered species in particular, frequent consultations are held with the local communities.		
<b>63.</b> Has your country developed mechanisms for promoting the full and effective participation of indigenous and local communities with specific provisions for the full, active and effective participation of women in all elements of the programme of work? (decision V/16, annex)		
a) No		
b) No, but relevant mechanisms are being developed	Х	
c) Yes, mechanisms are in place (please provide details below)		
Further comments on the mechanisms for promoting the full and effective participation of women of indigenous and local communities in all elements of the programme of work.		

## **Support to implementation**

<b>64.</b> Has your country established national, subregional and/or regional in community biodiversity advisory committees?	ndigenous and local
a) No	
b) No, but relevant work is under way	X
c) Yes	

<b>65.</b> Has your country assisted indigenous and local community organization meetings to discuss the outcomes of the decisions of the Conference of the Partie meetings under the Convention?	
a) No	Х
b) Yes (please provide details about the outcome of meetings)	
Further information on the outcome of regional meetings.	

<b>66.</b> Has your country supported, financially and otherwise, indigenous and local communities in formulating their own community development and biodiversity conservation plans that will enable such communities to adopt a culturally appropriate strategic, integrated and phased approach to their development needs in line with community goals and objectives?	
a) No	
b) Yes, to some extent (please provide details below)	X
c) Yes, to a significant extent (please provide details below)	
Further information on the support provided.	

### **Box XLVII.**

Please elaborate below on the implementation of this article and associated decisions specifically focusing on:

- a) outcomes and impacts of actions taken;
- b) contribution to the achievement of the goals of the Strategic Plan of the Convention;
- c) contribution to progress towards the 2010 target;
- d) progress in implementing national biodiversity strategies and action plans;
- e) contribution to the achievement of the Millennium Development Goals;
- f) constraints encountered in implementation.

Respect for the traditional knowledge is part of the national culture, and this knowledge is protected. Commercial use of the traditional knowledge does not occur in any significant way.

## Article 9 - Ex-situ conservation

<b>67.</b> $\bigcirc$ On Article 9(a) and (b), has your country adopted measures for the <i>ex</i> components of biological diversity native to your country and originating outside	-situ conservation of your country?
a) No	
b) No, but potential measures are under review	
c) Yes, some measures are in place (please provide details below)	
d) Yes, comprehensive measures are in place (please provide details below)	x

<b>69.</b> ◆ On Article 9(d), has your country taken measures to regulate and man biological resources from natural habitats for <i>ex-situ</i> conservation purposes so ecosystems and <i>in-situ</i> populations of species?	
a) No	
b) No, but potential measures are under review	
c) Yes, some measures are in place (please provide details below)	Х
d) Yes, comprehensive measures are in place (please provide details below)	
Further information on the measures to regulate and manage the collection of from natural habitats for $ex$ -situ conservation purposes so as not to threaten ec populations of species.	
All types of collection of wild species are controlled by the Supreme Council to Natural Reserves.	for Environment and

#### Box XLVIII.

Please elaborate below on the implementation of this article and associated decisions specifically focusing on:

- a) outcomes and impacts of actions taken;
- b) contribution to the achievement of the goals of the Strategic Plan of the Convention;
- c) contribution to progress towards the 2010 target;

sustainable use of biological resources into national decision-making?

- d) progress in implementing national biodiversity strategies and action plans;
- e) contribution to the achievement of the Millennium Development Goals;
- f) constraints encountered in implementation.

Endangered species, Arabian oryx and gazelles, in particular, have greatly benefited from the ex situ breeding of them. Capacity building in ex situ collections of plant species has to be enhanced.

## Article 10 - Sustainable use of components of biological diversity

**70.** ♦ On Article 10(a), has your country integrated consideration of the conservation and

a) No		
b) No, but steps are being taken		
c) Yes, in some relevant sectors (please provide details below)	X	
d) Yes, in most relevant sectors (please provide details below)		
Further information on integrating consideration of conservation and sustainable use of biological resources into national decision-making.		
<b>71.</b> ○ On Article 10(b), has your country adopted measures relating to the use of biological resources that avoid or minimize adverse impacts on biological diversity?		
a) No		
,		
b) No, but potential measures are under review		
	X	
b) No, but potential measures are under review	X	
<ul><li>b) No, but potential measures are under review</li><li>c) Yes, some measures are in place (please provide details below)</li><li>d) Yes, comprehensive measures are in place (please provide details</li></ul>		
<ul> <li>b) No, but potential measures are under review</li> <li>c) Yes, some measures are in place (please provide details below)</li> <li>d) Yes, comprehensive measures are in place (please provide details below)</li> <li>Further information on the measures adopted relating to the use of biological res</li> </ul>		

a) No b) No, but potential measures are under review c) Yes, some measures are in place (please provide details below) d) Yes, comprehensive measures are in place (please provide details below)  Further information on the measures that protect and encourage customary use of biological resources that is compatible with conservation or sustainable use requirements.  The challenge is to recreate the traditional institutions of customary use within the requirements of modern institutional arrangements.  73. On Article 10(d), has your country put in place measures that help local populations develop and implement remedial action in degraded areas where biological diversity has been reduced?  a) No b) No, but potential measures are under review c) Yes, some measures are in place (please provide details below)  d) Yes, comprehensive measures are in place (please provide details below)  Further information on the measures that help local populations develop and implement remedial action in degraded areas where biodiversity has been reduced.  74. Has your country identified indicators and incentive measures for sectors relevant to the conservation and sustainable use of biodiversity? (decision V/24)  a) No b) No, but assessment of potential indicators and incentive measures is under way c) Yes, indicators and incentive measures identified (please describe below)  Further comments on the identification of indicators and incentive measures for sectors relevant to the conservation and sustainable use of biodiversity.	<b>72.</b> On Article 10(c), has your country put in place measures that procustomary use of biological resources that is compatible with conservation requirements?	otect and encourage or sustainable use
c) Yes, some measures are in place (please provide details below)  d) Yes, comprehensive measures are in place (please provide details below)  Further information on the measures that protect and encourage customary use of biological resources that is compatible with conservation or sustainable use requirements.  The challenge is to recreate the traditional institutions of customary use within the requirements of modern institutional arrangements.  73.  ○ On Article 10(d), has your country put in place measures that help local populations develop and implement remedial action in degraded areas where biological diversity has been reduced?  a) No  b) No, but potential measures are under review  c) Yes, some measures are in place (please provide details below)  X  d) Yes, comprehensive measures are in place (please provide details below)  Further information on the measures that help local populations develop and implement remedial action in degraded areas where biodiversity has been reduced.  74. ○ Has your country identified indicators and incentive measures for sectors relevant to the conservation and sustainable use of biodiversity? (decision V/24)  a) No  b) No, but assessment of potential indicators and incentive measures is under way  c) Yes, indicators and incentive measures identified (please describe below)  Further comments on the identification of indicators and incentive measures for sectors relevant to	a) No	
d) Yes, comprehensive measures are in place (please provide details below)  Further information on the measures that protect and encourage customary use of biological resources that is compatible with conservation or sustainable use requirements.  The challenge is to recreate the traditional institutions of customary use within the requirements of modern institutional arrangements.  73.  ○ On Article 10(d), has your country put in place measures that help local populations develop and implement remedial action in degraded areas where biological diversity has been reduced?  a) No  b) No, but potential measures are under review  c) Yes, some measures are in place (please provide details below)  d) Yes, comprehensive measures are in place (please provide details below)  Further information on the measures that help local populations develop and implement remedial action in degraded areas where biodiversity has been reduced.  74. ○ Has your country identified indicators and incentive measures for sectors relevant to the conservation and sustainable use of biodiversity? (decision V/24)  a) No  b) No, but assessment of potential indicators and incentive measures is under way  c) Yes, indicators and incentive measures identified (please describe below)  Further comments on the identification of indicators and incentive measures for sectors relevant to	b) No, but potential measures are under review	
Further information on the measures that protect and encourage customary use of biological resources that is compatible with conservation or sustainable use requirements.  The challenge is to recreate the traditional institutions of customary use within the requirements of modern institutional arrangements.  73. On Article 10(d), has your country put in place measures that help local populations develop and implement remedial action in degraded areas where biological diversity has been reduced?  a) No b) No, but potential measures are under review c) Yes, some measures are in place (please provide details below) d) Yes, comprehensive measures are in place (please provide details below)  Further information on the measures that help local populations develop and implement remedial action in degraded areas where biodiversity has been reduced.  74. Has your country identified indicators and incentive measures for sectors relevant to the conservation and sustainable use of biodiversity? (decision V/24)  a) No b) No, but assessment of potential indicators and incentive measures is under way c) Yes, indicators and incentive measures identified (please describe below)  Further comments on the identification of indicators and incentive measures for sectors relevant to	c) Yes, some measures are in place (please provide details below)	Х
The challenge is to recreate the traditional institutions of customary use within the requirements of modern institutional arrangements.  73.  ○ On Article 10(d), has your country put in place measures that help local populations develop and implement remedial action in degraded areas where biological diversity has been reduced?  a) No  b) No, but potential measures are under review  c) Yes, some measures are in place (please provide details below)  d) Yes, comprehensive measures are in place (please provide details below)  Further information on the measures that help local populations develop and implement remedial action in degraded areas where biodiversity has been reduced.  74. ○ Has your country identified indicators and incentive measures for sectors relevant to the conservation and sustainable use of biodiversity? a) No
b) Yes (please provide details below) X

Further comments on the initiatives by major groups, key actors and stakeholders that integrate biodiversity conservation in their practice and education programmes as well as their relevant sectoral and cross-sectoral plans, programmes and policies.

Cooperation with NGOs, youth groups, the business community, etc has been forged in this respect.

**100.** Is your country communicating the various elements of the 2010 biodiversity target and establishing appropriate linkages to the Decade on Education for Sustainable Development in the implementation of your national CEPA programmes and activities? (decision VII/24)

a)	No	
b)	No, but some programmes are under development	X
c)	Yes, some programmes developed and activities undertaken for this purpose (please provide details below)	
d)	Yes, comprehensive programmes developed and many activities undertaken for this purpose (please provide details below)	

Further comments on the communication of the various elements of the 2010 biodiversity target and the establishment of linkages to the Decade on Education for Sustainable Development.

### Box LII.

Please elaborate below on the implementation of this article and associated decisions specifically focusing on:

- a) outcomes and impacts of actions taken;
- b) contribution to the achievement of the goals of the Strategic Plan of the Convention;
- c) contribution to progress towards the 2010 target;
- d) progress in implementing national biodiversity strategies and action plans;
- e) contribution to the achievement of the Millennium Development Goals;
- f) constraints encountered in implementation.

Public support is the key determinant in the success of the conservation program; hence heavy emphasis is laid on the need for promoting public awareness on environment and biodiversity issues. The implementation of the Environmental Education and Awareness Strategy is yielding very positive results in terms of change in public attitude and proactive support for the conservation project, and this trend is set to grow.

## Article 14 - Impact assessment and minimizing adverse impacts

impact assessment of proposed projects likely to have adverse effects on biologic	
a) No	
b) No, legislation is still in early stages of development	
c) No, but legislation is in advanced stages of development	Х
d) Yes, legislation is in place (please provide details below)	
e) Yes, review of implementation available (please provide details below)	
Further information on the legislation requiring EIA of proposed projects like effects on biodiversity.	ely to have adverse
The draft law requires environmental impact assessment to be conducted for all projects that are likely to have an impact on the environment. The law requires impact assessments be submitted to SCENR for approval. Licensing authorities a licenses only after environmental permission is given by SCENR. The law lists trequired to undergo an environmental impact assessment.	s that environmental are required to grant
<b>102.</b> On Article 14.1(b), has your country developed mechanisms to consideration is given to the environmental consequences of national programmare likely to have significant adverse impacts on biological diversity?	
a) No	
b) No, mechanisms are still in early stages of development	
c) No, but mechanisms are in advanced stages of development	X
d) Yes, mechanisms are in place (please provide details below)	
Further comments on the mechanisms developed to ensure that due consideral environmental consequences of national programmes and policies that are likely adverse impacts on biodiversity.	
See 101 above	
<b>103.</b> On Article 14.1(c), is your country implementing bilateral, regional agreements on activities likely to significantly affect biological diversity out jurisdiction?	
a) No	
b) No, but assessment of options is in progress	X
c) Yes, some completed, others in progress (please provide details below)	
d) Yes (please provide details below)

#### Box LIII.

Please elaborate below on the implementation of this article and associated decisions specifically focusing on:

- a) outcomes and impacts of actions taken;
- b) contribution to the achievement of the goals of the Strategic Plan of the Convention;
- c) contribution to progress towards the 2010 target;
- d) progress in implementing national biodiversity strategies and action plans;
- e) contribution to the achievement of the Millennium Development Goals;
- f) constraints encountered in implementation.

EIA of development works that may impact on biodiversity is being carried out and clearances in other areas take EIA as a consideration before granting permits for such works, and the proposed EIA law is expected to reinforce this trend.

## **Article 15 - Access to genetic resources**

<b>110.</b> ◆ Has your country endeavored to facilitate access to genetic resources sound uses by other Parties, on the basis of prior informed consent and mutua accordance with paragraphs 2, 4 and 5 of Article 15?				
a) No				
b) Yes (please provide details below)	X			
Further information on the efforts taken by your country to facilitate access to genetic resources for environmentally sound uses by other Parties, on the basis of prior informed consent and mutually agreed terms.				

Foreign researchers have been provided access to the country's biodiversity. Commercially oriented agreements seldom occur. However, there are institutional constraints in tracking the exact fate of the genetic resources taken out of the country, even when it is by mutual agreement.

<b>111.</b> ⚠ Has your country taken measures to ensure that any scientific research resources provided by other Parties is developed and carried out with the full parties, in accordance with Article 15(6)?	
a) No	

a) No	
b) No, but potential measures are under review	
c) Yes, some measures are in place (please provide details below)	
d) Yes, comprehensive measures are in place (please provide details below)	X

Further information on the measures to ensure that any scientific research based on genetic resources provided by other Contracting Parties is developed and carried out with the full participation of such Contracting Parties.

This has little relevance to Qatar as the research conducted by the country so far are all within the country itself.

research and development and of the benefits arising from the commercial and other use of genetic resources with any Contracting Party providing such resources, in accordance with Article 15(7)?  a) No  b) No, but potential measures are under review  c) Yes, some measures are in place (please provide details below)  d) Yes, comprehensive legislation is in place (please provide details below)  e) Yes, comprehensive statutory policy or subsidiary legislation are in place (please provide details below)  f) Yes, comprehensive policy and administrative measures are in place (please provide details below)  Further information on the type of measures taken.  113. In developing national measures to address access to genetic resources and benefitsharing, has your country taken into account the multilateral system of access and benefit-sharing set out in the International Treaty on Plant Genetic Resources for Food and Agriculture?  a) No  b) Yes (please provide details below)  X  Further information on national measures taken which consider the multilateral system of access and benefit-sharing as set out in the International Treaty on Plant Genetic Resources for Food and Agriculture.			
b) No, but potential measures are under review  c) Yes, some measures are in place (please provide details below)  d) Yes, comprehensive legislation is in place (please provide details below)  e) Yes, comprehensive statutory policy or subsidiary legislation are in place (please provide details below)  f) Yes, comprehensive policy and administrative measures are in place (please provide details below)  Further information on the type of measures taken.  113. In developing national measures to address access to genetic resources and benefit-sharing, has your country taken into account the multilateral system of access and benefit-sharing set out in the International Treaty on Plant Genetic Resources for Food and Agriculture?  a) No  b) Yes (please provide details below)  X  Further information on national measures taken which consider the multilateral system of access and benefit-sharing as set out in the International Treaty on Plant Genetic Resources for Food and Agriculture.  114. Is your country using the Bonn Guidelines when developing and drafting legislative, administrative or policy measures on access and benefit-sharing and/or when negotiating contracts and other arrangements under mutually agreed terms for access and benefit-sharing? (decision VII/19A)  a) No  b) No, but steps being taken to do so (please provide details below)  C) Yes (please provide details below)  Please provide details and specify successes and constraints in the implementation of the Bonn Guidelines.  Requests for commercially oriented access to Qatar's biodiversity has been rather rare. The country accessing genetic resources abroad for commercial development is also rare; Qatar is firmly

**115.** Has your country adopted national policies or measures, including legislation, which address the role of intellectual property rights in access and benefit-sharing arrangements (i.e. the issue of disclosure of origin/source/legal provenance of genetic resources in applications for intellectual property rights where the subject matter of the application concerns, or makes use of, genetic resources in its development)?

a) No	
<ul> <li>No, but potential policies or measures have been identified (please specify below)</li> </ul>	X
<ul> <li>No, but relevant policies or measures are under development (please specify below)</li> </ul>	
d) Yes, some policies or measures are in place (please specify below)	
e) Yes, comprehensive policies or measures adopted (please specify below)	

Further information on policies or measures that address the role of IPR in access and benefit-sharing arrangements.

**116.** Has your country been involved in capacity-building activities related to access and benefitsharing?

Sharing.	
a) Yes (please provide details below)	Х
b) No	

Please provide further information on capacity-building activities (your involvement as donor or recipient, key actors involved, target audience, time period, goals and objectives of the capacity-building activities, main capacity-building areas covered, nature of activities). Please also specify whether these activities took into account the Action Plan on capacity-building for access and benefit-sharing adopted at COP VII and available in annex to decision VII/19F.

This is an area in which the expertise is lacking and would look forward to the CBD Secretariat taking some lead in organizing a series of regionally focused training programs.

### Box LIV.

Please elaborate below on the implementation of this article and associated decisions specifically focusing on:

- a) outcomes and impacts of actions taken;
- b) contribution to the achievement of the goals of the Strategic Plan of the Convention;
- c) contribution to progress towards the 2010 target;
- d) progress in implementing national biodiversity strategies and action plans;
- e) contribution to the achievement of the Millennium Development Goals;
- f) constraints encountered in implementation.

In keeping with its tradition, as well as in line with CBD, Qatar provides access for foreign entities to the country's biodiversity for research and educational purposes, and is open for commercially oriented access based on the CBD provisions. The CBD may take a lead to set up an effective international mechanism, either as a multilateral system or along the lines of TRAFFIC as in the context of CITES to advise, monitor, track implementation of the agreed terms & report, publicise and take recourse to law in the event of infractions.

## Article 16 - Access to and transfer of technology

<b>117.</b> ○ On Article 16(1), has your country taken measures to provide or facilitate access for and transfer to other Parties of technologies that are relevant to the conservation and sustainable use of biological diversity or make use of genetic resources and do not cause significant damage to the environment?		
a) No		
b) No, but potential measures are under review		
c) Yes, some measures are in place (please provide details below)	X	
d) Yes, comprehensive measures are in place (please provide details below)		
Further information on the measures to provide or facilitate access for and transf technologies that are relevant to the conservation and sustainable use of biodive genetic resources and do not cause significant damage to the environment.		
Qatar is all prepared to provide access to technologies that are well developed in such technologies in relation to biodiversity are few.	the country, though	
<b>118.</b> ○ On Article 16(3), has your country taken measures so that Parties w resources are provided access to and transfer of technology which make use of mutually agreed terms?		
a) No		
b) No, but potential measures are under review		
c) Yes, some measures are in place	X	
d) Yes, comprehensive legislation is in place		
e) Yes, comprehensive statutory policy or subsidiary legislation are in place		
f) Yes, comprehensive policy and administrative arrangements are in place		
g) Not applicable		
Qatar accessing biodiversity abroad for technology-aided development seldom oc	ccurs.	
<b>119.</b> On Article 16(4), has your country taken measures so that the privaccess to joint development and transfer of relevant technology for the be institutions and the private sector of developing countries?		
a) No		
b) No, but potential measures are under review		
c) Yes, some policies and measures are in place (please provide details below)	X	
d) Yes, comprehensive policies and measures are in place (please provide details below)		
e) Not applicable

See 118			

### Box LV.

Please elaborate below on the implementation of this article specifically focusing on:

- a) outcomes and impacts of actions taken;
- b) contribution to the achievement of the goals of the Strategic Plan of the Convention;
- c) contribution to progress towards the 2010 target;
- d) progress in implementing national biodiversity strategies and action plans;
- e) contribution to the achievement of the Millennium Development Goals;
- f) constraints encountered in implementation.

As a developing country, Qatar looks forward to access appropriate technologies that are environmentally harmonious, while the country is firmly committed to share its technological advances with other countries that are in need.

## Programme of Work on transfer of technology and technology cooperation

		·
	s your country provided financial and technical support and training ntation of the programme of work on transfer of technology and tech VII/29)	
a)	No	
b)	No, but relevant programmes are under development	X
c)	Yes, some programmes being implemented (please provide details below)	
d)	Yes, comprehensive programmes being implemented (please provide details below)	
Further comments on the provision of financial and technical support and training to assist in the implementation of the programme of work on transfer of technology and technology cooperation.		
See box	LV	

<b>121.</b> Is your country taking any measures to remove unnecessary impediments country initiatives for technology transfer and for scientific and technical country (VII/29)	
a) No	
b) No, but some measures being considered	X
c) Yes, some measures are in place (please provide details below)	
d) Yes, comprehensive measures are in place (please provide details below)	
Further comments on the measures to remove unnecessary impediments to func- initiatives for technology transfer and for scientific and technical cooperation.	ding of multi-country

<b>122.</b> Has your country made any technology assessments addressing technology needs, opportunities and barriers in relevant sectors as well as related needs in capacity building? (annex to decision VII/29)		
a) No		
b) No, but assessments are under way		
c) Yes, basic assessments undertaken (please provide details below)	Х	
d) Yes, thorough assessments undertaken (please provide details below)		
Further comments on technology assessments addressing technology need barriers in relevant sectors as well as related needs in capacity building.	ls, opportunities and	
The preliminary assessment shows the technology needs in the field of biotec there is an urgent need to remove barriers to the transfer of relevant techn countries.		
<b>123.</b> Has your country made any assessments and risk analysis of the potent associated costs with the introduction of new technologies? (annex to decision V		
a) No		
b) No, but assessments are under way	X	
c) Yes, some assessments undertaken (please provide details below)		
d) Yes, comprehensive assessments undertaken (please provide details below)

<b>124.</b> Has your country identified and implemented any measures to deappropriate information systems for technology transfer and cooperation, capacity building needs? (annex to decision VII/29)		
a) No		
b) No, but some programmes are under development	X	
c) Yes, some programmes are in place and being implemented (please provide details below)		
d) Yes, comprehensive programmes are being implemented (please provide details below)		
Further comments on measures to develop or strengthen appropriate info technology transfer and cooperation.	ormation systems for	

<b>125.</b> Has your country taken any of the measures specified under Target 3.2 of the programme of work as a preparatory phase to the development and implementation of national institutional, administrative, legislative and policy frameworks to facilitate cooperation as well as access to and adaptation of technologies of relevance to the Convention? (annex to decision VII/29)		
a) No		
b) No, but a few measures being considered		
c) Yes, some measures taken (please specify below)	X	
d) Yes, many measures taken (please specify below)		
Further comments on the measures taken as a preparatory phase to the development and implementation of national institutional, administrative, legislative and policy frameworks to facilitate cooperation as well as access to and adaptation of technologies of relevance to the Convention.		

#### Box LVI.

Please elaborate below on the implementation of this article and associated decisions specifically focusing on:

- a) outcomes and impacts of actions taken;
- b) contribution to the achievement of the goals of the Strategic Plan of the Convention;
- c) contribution to progress towards the 2010 target;
- d) progress in implementing national biodiversity strategies and action plans;
- e) contribution to the achievement of the Millennium Development Goals;
- f) constraints encountered in implementation.

See box LV

## **Article 17 - Exchange of information**

<b>126.</b> ♦ On Article 17(1), has your country taken measures to facilitate the exchange of information from publicly available sources with a view to assist with the implementation of the Convention and promote technical and scientific cooperation?		
a) No		
b) No, but potential measures are under review		
c) Yes, some measures are in place		
d) Yes, comprehensive measures are in place	X	

## The following question (127) is for DEVELOPED COUNTRIES

<b>127.</b> ◆ On Article 17(1), do these measures take into account the special countries and include the categories of information listed in Article 17(2), such a and socio-economic research, training and surveying programmes, special repatriation of information and so on?	s technical, scientific
a) No	
b) Yes, but they do not include the categories of information listed in Article 17(2), such as technical, scientific and socio-economic research, training and surveying programmes, specialized knowledge, repatriation of information and so on	
<ul> <li>c) Yes, and they include categories of information listed in Article 17         <ul> <li>(2), such as technical, scientific and socio-economic research, training and surveying programmes, specialized knowledge, repatriation of information and so on</li> </ul> </li> </ul>	

### Box LVII.

Please elaborate below on the implementation of this article and associated decisions specifically focusing on:

- a) outcomes and impacts of actions taken;
- b) contribution to the achievement of the goals of the Strategic Plan of the Convention;
- c) contribution to progress towards the 2010 target;
- d) progress in implementing national biodiversity strategies and action plans;
- e) contribution to the achievement of the Millennium Development Goals;
- f) constraints encountered in implementation.

Information exchanged through a variety of media including journals and books/reports, internet, frequent regional/international scientific meetings, etc. Information dissemination and exchange is critical in achieving the biodiversity loss reduction target.

## Article 18 - Technical and scientific cooperation

Article 10 - recinical and scientific cooperati	Oli
128. On Article 18(1), has your country taken measures to promote international scientific cooperation in the field of conservation and sustainable use of biological	
a) No	
b) No, but potential measures are under review	
c) Yes, some measures are in place (please provide details below)	X
d) Yes, comprehensive measures are in place (please provide details below)	
Further information on the measures to promote international technical and scien	tific cooperation.
SCENR and Scientific and Applied Research Centre lead the country in f cooperation for the conservation and sustainable use of biodiversity.	orging international

the development and use of technologies, including indigenous and tradition pursuance of the objectives of this Convention?	•
a) No	
b) No, but relevant methods are under development	Х
c) Yes, methods are in place	
<b>130.</b> On Article 18(5), has your country promoted the establishment programmes and joint ventures for the development of technologies relevant to to Convention?	of joint research the objectives of the
a) No	
b) Yes (please provide some examples below)	X
Examples for the establishment of joint research programmes and joint ventures of technologies relevant to the objectives of the Convention.	for the development
Regional and international cooperation has been developed for research on/cons bustard, gazelles and Arabian oryx.	ervation of Houbara
<b>131.</b> Has your country established links to non-governmental organizations, privinstitutions holding important databases or undertaking significant work on through the CHM? (decision $V/14$ )	
a) No	
b) No, but coordination with relevant NGOs, private sector and other institutions under way	
c) Yes, links established with relevant NGOs, private sector and institutions	X
The following question (132) is for DEVELOPED COUNTRIE	rs.
<b>132.</b> Has your country further developed the CHM to assist developing countries economies in transition to gain access to information in the field of scie cooperation? (decision V/14)	
a) No	
b) Yes, by using funding opportunities	
c) Yes, by means of access to, and transfer of technology	
d) Yes, by using research cooperation facilities	
e) Yes, by using repatriation of information	
f) Yes, by using training opportunities	
g) Yes, by using promotion of contacts with relevant institutions, organizations and the private sector	
h) Yes, by using other means (please specify below)	

Further comments on CHM developments to assist developing countries and countries with economies in transition to gain access to information in the field of scientific and technical cooperation.

133.	Has	your	country	used	CHM	to	make	information	available	more	useful	for	researchers	and
decisi	on-ma	akers	? (decisi	on V/1	14)									

a)	No	
b)	No, but relevant initiatives under consideration	X
c)	Yes (please provide details below)	

Further comments on development of relevant initiatives.

**134.** Has your country developed, provided and shared services and tools to enhance and facilitate the implementation of the CHM and further improve synergies among biodiversity-related Conventions? (decision V/14)

a) No	Х
b) Yes (please specify services and tools below)	

Further comments on services and tools to enhance and facilitate the implementation of CHM and further improve synergies among biodiversity-related Conventions.

CHM is being developed. SCENR being the national focal point for most of the biodiversity-related conventions, synergies in this respect are maximized.

#### **Box LVIII.**

Please elaborate below on the implementation of this article and associated decisions specifically focusing on:

- a) outcomes and impacts of actions taken;
- b) contribution to the achievement of the goals of the Strategic Plan of the Convention;
- c) contribution to progress towards the 2010 target;
- d) progress in implementing national biodiversity strategies and action plans;
- e) contribution to the achievement of the Millennium Development Goals;
- f) constraints encountered in implementation.

International cooperation in scientific research is important to reduce the gaps in the understanding on biodiversity which is critical for the realization of the 2010 target, and Qatar on our part is fully committed to this.

## Article 19 - Handling of biotechnology and distribution of its benefits

<b>135.</b> ◆ On Article 19(1), has your country taken measures to provide for the ein biotechnological research activities by those Contracting Parties which resources for such research?	
a) No	
b) No, but potential measures are under review	
c) Yes, some measures are in place	Х
d) Yes, comprehensive legislation are in place	
e) Yes, comprehensive statutory policy and subsidiary legislation are in place	
f) Yes, comprehensive policy and administrative measures are in place	

<b>136.</b> On Article 19(2), has your country taken all practicable measures to promote and advance priority access by Parties, on a fair and equitable basis, to the results and benefits arising from biotechnologies based upon genetic resources provided by those Parties?	
a) No	
b) No, but potential measures are under review	
c) Yes, some measures are in place	X
d) Yes, comprehensive measures are in place	

### Box LIX.

Please elaborate below on the implementation of this article and associated decisions specifically focusing on:

- a) outcomes and impacts of actions taken;
- b) contribution to the achievement of the goals of the Strategic Plan of the Convention;
- c) contribution to progress towards the 2010 target;
- d) progress in implementing national biodiversity strategies and action plans;
- e) contribution to the achievement of the Millennium Development Goals;
- f) constraints encountered in implementation.

It may however be noted that biotechnology development is only on the way to the advanced stage in the country.

## **Article 20 - Financial resources**

### Box LX.

Please describe for each of the following items the quantity of financial resources, both internal and external, that have been utilized, received or provided, as applicable, to implement the Convention on Biological Diversity, on an annual basis, since your country became a Party to the Convention.

a)	Budgetary allocations by national and local Governments as well as different sectoral ministries	With the Supreme Council annual budget.
b)	Extra-budgetary resources (identified by donor agencies)	Different govt agencies provide funds for certain specified activities. The corporate sector also makes some donations in this respect.
c)	Bilateral channels (identified by donor agencies)	External funds are generally not sought.
d)	Regional channels (identified by donor agencies)	This involves some programs undertaken in cooperation with the Gulf Cooperation Council
e)	Multilateral channels (identified by donor agencies)	Such external funds are generally not sought
f)	Private sources (identified by donor agencies)	Several corporate groups make donations
g)	Resources generated through financial instruments, such as charges for use of biodiversity	Inconsiderable

#### Box LXI.

Please describe in detail below any major financing programmes, such as biodiversity trust funds or specific programmes that have been established in your country.

There is an obvious need to look for innovative fund generation methods and such methods are expected to be employed in the near future.

137.				
b) Yes, incentives only (please provide a list of such incentives below) c) Yes, financial support only d) Yes, financial support and incentives (please provide details below)  The next question (138) is for DEVELOPED COUNTRIES  138. On Article 20(2), has your country provided new and additional financial resources to enable developing country Parties to meet the agreed incremental costs to them of implementing measures which fulfill the obligations of the Convention?  a) No b) Yes (please indicate the amount, on an annual basis, of new and additional financial resources your country has provided)  Further comments on new and additional financial resources provided.  The next question (139) is for DEVELOPING COUNTRIES OR COUNTRIES WITH ECONOMIES IN TRANSITION  139. On Article 20(2), has your country received new and additional financial resources to enable it to meet the agreed full incremental costs of implementing measures which fulfill the obligations of the Convention?  a) No b) Yes  140. Has your country established a process to monitor financial support to biodiversity, including support provided by the private sector? (decision V/11)  a) No b) No, but procedures being established c) Yes (please provide details below)  Further comments on processes to monitor financial support to biodiversity, including support		incentives to those		
c) Yes, financial support only d) Yes, financial support and incentives (please provide details below)  The next question (138) is for DEVELOPED COUNTRIES  138. On Article 20(2), has your country provided new and additional financial resources to enable developing country Parties to meet the agreed incremental costs to them of implementing measures which fulfill the obligations of the Convention?  a) No b) Yes (please indicate the amount, on an annual basis, of new and additional financial resources your country has provided)  Further comments on new and additional financial resources provided.  The next question (139) is for DEVELOPING COUNTRIES OR COUNTRIES WITH ECONOMIES IN TRANSITION  139. On Article 20(2), has your country received new and additional financial resources to enable it to meet the agreed full incremental costs of implementing measures which fulfill the obligations of the Convention?  a) No b) Yes  140. Has your country established a process to monitor financial support to biodiversity, including support provided by the private sector? (decision V/11)  a) No b) No, but procedures being established c) Yes (please provide details below)  Further comments on processes to monitor financial support to biodiversity, including support	a) No			
d) Yes, financial support and incentives (please provide details below)  Further comments on financial support and incentives provided.  The next question (138) is for DEVELOPED COUNTRIES  138. On Article 20(2), has your country provided new and additional financial resources to enable developing country Parties to meet the agreed incremental costs to them of implementing measures which fulfill the obligations of the Convention?  a) No  b) Yes (please indicate the amount, on an annual basis, of new and additional financial resources your country has provided)  Further comments on new and additional financial resources provided.  The next question (139) is for DEVELOPING COUNTRIES OR COUNTRIES WITH ECONOMIES IN TRANSITION  139. On Article 20(2), has your country received new and additional financial resources to enable it to meet the agreed full incremental costs of implementing measures which fulfill the obligations of the Convention?  a) No  b) Yes  140. Has your country established a process to monitor financial support to biodiversity, including support provided by the private sector? (decision V/11)  a) No  b) No, but procedures being established  c) Yes (please provide details below)  Further comments on processes to monitor financial support to biodiversity, including support	b) Yes, incentives only (please provide a list of such incentives below)			
The next question (138) is for DEVELOPED COUNTRIES  138.  On Article 20(2), has your country provided new and additional financial resources to enable developing country Parties to meet the agreed incremental costs to them of implementing measures which fulfill the obligations of the Convention?  a) No  b) Yes (please indicate the amount, on an annual basis, of new and additional financial resources your country has provided)  Further comments on new and additional financial resources provided.  The next question (139) is for DEVELOPING COUNTRIES OR COUNTRIES WITH ECONOMIES IN TRANSITION  139. On Article 20(2), has your country received new and additional financial resources to enable it to meet the agreed full incremental costs of implementing measures which fulfill the obligations of the Convention?  a) No  b) Yes  140. Has your country established a process to monitor financial support to biodiversity, including support provided by the private sector? (decision V/11)  a) No  b) No, but procedures being established  c) Yes (please provide details below)  Further comments on processes to monitor financial support to biodiversity, including support	c) Yes, financial support only			
The next question (138) is for DEVELOPED COUNTRIES  138. ○ On Article 20(2), has your country provided new and additional financial resources to enable developing country Parties to meet the agreed incremental costs to them of implementing measures which fulfill the obligations of the Convention?  a) No  b) Yes (please indicate the amount, on an annual basis, of new and additional financial resources your country has provided)  Further comments on new and additional financial resources provided. # The next question (146) is for DEVELOPING COUNTRIES OR COUNTRIES WITH ECONOMIES IN TRANSITION

**146.** Please indicate with an "X" in the table below in which areas your country has applied for funds from the Global Environment Facility (GEF), from developed countries and/or from other sources. The same area may have more than one source of financial support. Please elaborate in the space below if necessary.

Areas		Applied for funds from		
		Bilateral	Other	
a) Preparation of national biodiversity strategies or action plans				
b) National capacity self-assessment for implementation of Convention (decision VI/27)				
c) Priority actions to implement the Global Taxonomy Initiative (decision V/9)				
d) In-situ conservation (decision V/16)				
e) Development of national strategies or action plans to deal with alien species (decision VI/23)				
f) Ex-situ conservation, establishment and maintenance of Ex-situ conservation facilities (decision V/26)				
g) Projects that promote measures for implementing Article 13 (Education and Public Awareness) (decision VI/19)				
h) Preparation of national reports (decisions III/9, V/19 and VI/25)				
i) Projects for conservation and sustainable use of inland water biological diversity (decision IV/4)				
j) Activities for conservation and sustainable use of agricultural biological diversity (decision V/5)				
k) Implementation of the Cartagena Protocol on Biosafety (decision VI/26)				

l) Implementation of the Global Taxonomy Initiative		
m) Implementation of the Addis Ababa Principles and Guidelines for the Sustainable Use of Biodiversity		
n) Others (please specify)		
Further information on application for financial support.		
Qatar generally does not seek such external funds		

### Box LXII.

Please elaborate below on the implementation of this article and associated decisions specifically focusing on:

- a) outcomes and impacts of actions taken;
- b) contribution to the achievement of the goals of the Strategic Plan of the Convention;
- c) contribution to progress towards the 2010 target;
- d) progress in implementing national biodiversity strategies and action plans;
- e) contribution to the achievement of the Millennium Development Goals;
- f) constraints encountered in implementation.

Funding provision for biodiversity related work is reasonably good, though there is emerging need for more funds.

## **D. THEMATIC AREAS**

**147.** Please use the scale indicated below to reflect the level of challenges faced by your country in implementing the thematic programmes of work of the Convention (marine and coastal biodiversity, agricultural biodiversity, forest biodiversity, inland waters biodiversity, dry and sub-humid lands and mountain biodiversity).

3 = High Challenge 1 = Low Challenge 2 = Medium Challenge 0 = Challenge has been successfully overcome

N/A = Not applicable

	Programme of Work					
Challenges	Agricultural	Forest	Marine and coastal	Inland water ecosystem	Dry and subhumid lands	Mountain
(a) Lack of political will and support	0	0	0	0	0	n/a
(b) Limited public participation and stakeholder involvement	1	1	1	1	0	
(c) Lack of main- streaming and integration of biodiversity issues into other sectors	2	1	1	1	1	
(d) Lack of precautionary and proactive measures	1	1	0	1	1	
(e) Inadequate capacity to act, caused by institutional weakness	1	1	2	1	1	
(f) Lack of transfer of technology and expertise	1	0	1	0	1	
(g) Loss of traditional knowledge	2	1	1	1	1	
(h) Lack of adequate scientific research capacities to support all the objectives	1	1	2	1	1	
(i) Lack of accessible knowledge and information	1	1	1	0	0	
(j) Lack of public education and awareness at all levels	2	1	1	0	1	
(k) Existing scientific and traditional knowledge not fully utilized	2	1	1	1	1	

(I) Loss of biodiversity and the corresponding goods and services it provides not properly understood and documented	1	1	1	0	1	
(m) Lack of financial, human, technical resources	1	1	1	1	1	
(n) Lack of economic incentive measures	1	1	2	1	1	
(o) Lack of benefit- sharing	1	1	1	0	1	
(p) Lack of synergies at national and international levels	1	1	2	1	2	
(q) Lack of horizontal cooperation among stakeholders	1	1	1	1	1	
(r) Lack of effective partnerships	1	0	1	0	1	
(s) Lack of engagement of scientific community	2	1	1	1	1	
(t) Lack of appropriate policies and laws	1	0	1	0	1	
(u) Poverty	0	0	0	0	1	
(v) Population pressure	0	0	1	0	0	
(w) Unsustainable consumption and production patterns	1	1	1	1	1	
(x) Lack of capacities for local communities	1	1	1	0	1	
(y) Lack of knowledge and practice of ecosystem-based approaches to management	1	1	1	0	1	
(z) Weak law enforcement capacity	1	1	2	1	1	
(aa) Natural disasters and environmental change	2	2	1	1	1	
(bb) Others (please specify)						

# **Inland water ecosystems**

**148.** Has your country incorporated the objectives and relevant activities of the programme of work into the following and implemented them? (decision VII/4)

St	trategies, policies, plans and activities	No	Yes, partially, integrated but not implemented	Yes, fully integrated and implemented	N/A
a)	Your biodiversity strategies and action plans			X	
b)	Wetland policies and strategies				x
c)	Integrated water resources management and water efficiency plans being developed in line with paragraph 25 of the Plan of Implementation of the World Summit on Sustainable Development		X		
d)	Enhanced coordination and cooperation between national actors responsible for inland water ecosystems and biological diversity		X		

Further comments on incorporation of the objectives and activities of the programme of work

Qatar's inland water ecosystems are limited to farming lagoons and ephemeral streams and pools in the wadis.

149.	Has your	country	identified	priorities	for each	h activity	in the	e programme	of work,	including
times	cales, in re	elation to	outcome of	oriented ta	argets?	(decision	VII/4)			

a) No	
<ul> <li>b) Outcome oriented targets developed but priority activities not developed</li> </ul>	
c) Priority activities developed but not outcome oriented targets	Х
<ul> <li>d) Yes, comprehensive outcome oriented targets and priority activities developed</li> </ul>	

Further comments on the adoption of outcome oriented targets and priorities for activities, including providing a list of targets (if developed).

a) Not applicable (not Party to Ramsar Convention)	X
b) No	
c) No, but potential measures were identified for synergy and joint implementation	
d) Yes, some measures taken for joint implementation (please specify below)	
e) Yes, comprehensive measures taken for joint implementation (please specify below)	

Further comments on the promotion of synergies between the programme of work and related activities under the Ramsar Convention as well as the implementation of the Joint Work Plan (CBD-Ramsar) at the national level.

# **151.** Has your country taken steps to improve national data on: (decision VII/4)

	Issues	Yes	No	No, but development is under way
-	ds and services provided by inlander ecosystems?	X		
•	uses and related socioeconomic ables of such goods and services?			x
supp	c hydrological aspects of water ly as they relate to maintaining ystem function?			X
d) Spec	cies and all taxonomic levels?	Х		
e) On ecos	threats to which inland water ystems are subjected?			x

Further comments on the development of data sets, in particular a list of data sets developed in case you have replied "YES" above.

<b>152.</b> Has your country promoted the application of the guidelines on the rapid assessment of the biological diversity of inland water ecosystems? (decision VII/4 )					
a) No, the guidelines have not been reviewed					
b) No, the guidelines have been reviewed and found inappropriate					
c) Yes, the guidelines have been reviewed and application/promotion is pending	X				
d) Yes, the guidelines promoted and applied					
Further comments on the promotion and application of the guidelines on the rapid assessment of the biological diversity of inland water ecosystems.					

#### Box LXIII.

Please elaborate below on the implementation of this programme of work and associated decisions specifically focusing on:

- a) outcomes and impacts of actions taken;
- b) contribution to the achievement of the goals of the Strategic Plan of the Convention;
- c) contribution to progress towards the 2010 target;
- d) progress in implementing national biodiversity strategies and action plans;
- e) contribution to the achievement of the Millennium Development Goals;
- f) constraints encountered in implementation.

Though Qatar has no significant inland wetlands as mentioned before, the country seeks to protect the farming lagoons and the ephemeral streams and pools.

# Marine and coastal biological diversity General

<b>153.</b> Do your country's strategies and action plans include the following? Please use an " $\mathbf{X}$ " to indicate your response. (decisions II/10 and IV/15)						
a) Developing new marine and coastal protected areas	Х					
<ul> <li>Improving the management of existing marine and coastal protected areas</li> </ul>	Х					
<ul> <li>Building capacity within the country for management of marine and coastal resources, including through educational programmes and targeted research initiatives (if yes, please elaborate on types of initiatives in the box below)</li> </ul>	X					
d) Instituting improved integrated marine and coastal area management (including catchments management) in order to reduce sediment and nutrient loads into the marine environment	x					
<ul> <li>e) Protection of areas important for reproduction, such as spawning and nursery areas</li> </ul>	X					
f) Improving sewage and other waste treatment	×					

g)	Controlling excessive fishing and destructive fishing practices	X			
h)	Developing a comprehensive oceans policy (if yes, please indicate current stage of development in the box below)	Х			
i)	X				
j)	Others (please specify below)				
k)	Not applicable				
	elaborate on the above activities and list any other priority actions relat stainable use of marine and coastal biodiversity.	ing to conservation			
An exte	rine Conservation Strategy of Qatar is a key document in this respect, and ensive Qatar Marine Environment Monitoring Program is in place. An extensive pared.				
	Implementation of Integrated Marine and Coastal Area Ma	nagement			
	las your country established and/or strengthened institutional, administrements for the development of integrated management of marine and coas				
a)	No				
b)	Early stages of development				
c)	Advanced stages of development				
d)	Arrangements in place (please provide details below)	Х			
e)	Not applicable				
Further manage	comments on the current status of implementation of integrated marin	ne and coastal area			
resourc	las your country implemented ecosystem-based management of n es, for example through integration of coastal management and watersh n integrated multidisciplinary coastal and ocean management?				
a)	No				
b)	b) Early stages of development				
c)	c) Advanced stages of development				
d)					
e)	Not applicable				
Further comments on the current status of application of the ecosystem to management of marine and coastal resources.					

# **Marine and Coastal Living Resources**

<b>156.</b> Has your country identified components of your marine and coastal ecosystems, which are critical for their functioning, as well as key threats to those ecosystems?						
a)	No					
b)	Plans for a comprehensive assessment of marine and coastal ecosystems are in place (please provide details below)					
c)	A comprehensive assessment is currently in progress					
d)	Critical ecosystem components have been identified, and management plans for them are being developed (please provide details below)	X				
e)	Management plans for important components of marine and coastal ecosystems are in place (please provide details below)					
f)	Not applicable					
Further comments on the current status of assessment, monitoring and research relating to marine and coastal ecosystems, as well as key threats to them						
This is	This is being addressed in the revised Marine Conservation Strategy.					

**157.** Is your country undertaking the following activities to implement the Convention's work plan on coral reefs? Please use an " $\mathbf{X}$ " to indicate your response.

	Activities	Not implemented nor a priority	Not implemented but a priority	Currently implemented	Not applicable
	Ecological assessment and monitoring of reefs			Х	
a	Socio-economic assessment and monitoring of communities and stakeholders		X		
th ir m c	Management, particularly hrough application of ntegrated coastal management and marine and coastal protected areas in coral reef environments			x	
ir a s	dentification and mplementation of additional and alternative measures for securing livelihoods of people who directly depend on coral reef services		X		
, c	Stakeholder partnerships, community participation programmes and public education campaigns		X		
c	Provision of training and career opportunities for marine taxonomists and ecologists			X	

g)	Development of early warning systems of coral bleaching		х	
h)	Development of a rapid response capability to document coral bleaching and mortality		x	
i)	Restoration and rehabilitation of degraded coral reef habitats		X	
j)	Others (please specify below)			
Ple	ase elaborate on ongoing activition	es.		

# **Marine and Coastal Protected Areas**

Marine and Coastar Protected Areas		
<b>158.</b> Which of the following statements can best describe the current status of marine and coastal protected areas in your country? Please use an "X" to indicate your response.		
<ul> <li>a) Marine and coastal protected areas have been declared and gazetted (please indicate below how many)</li> </ul>	Х	
<ul> <li>b) Management plans for these marine and coastal protected areas have been developed with involvement of all stakeholders</li> </ul>	Х	
c) Effective management with enforcement and monitoring has been put in place		
d) A national system or network of marine and coastal protected areas is under development		
e) A national system or network of marine and coastal protected areas has been put in place		
f) The national system of marine and coastal protected areas includes areas managed for purpose of sustainable use, which may allow extractive activities		
g) The national system of marine and coastal protected areas includes areas which exclude extractive uses	Х	
h) The national system of marine and coastal protected areas is surrounded by sustainable management practices over the wider marine and coastal environment.		
i) Other (please describe below)		
j) Not applicable		
Further comments on the current status of marine and coastal protected areas.		
Khor Al Odaid and Al Dhakhira are designated marine protected areas. More areas are being		

considered for designation as protected areas.

# Mariculture

<b>159.</b> Is your country applying the following techniques aimed at minimizing adverse impacts of mariculture on marine and coastal biodiversity? Please check all that apply.		
a)	Application of environmental impact assessments for mariculture developments	
b)	Development and application of effective site selection methods in the framework of integrated marine and coastal area management	
c)	Development of effective methods for effluent and waste control	
d)	Development of appropriate genetic resource management plans at the hatchery level	
e)	Development of controlled hatchery and genetically sound reproduction methods in order to avoid seed collection from nature.	
f)	If seed collection from nature cannot be avoided, development of environmentally sound practices for spat collecting operations, including use of selective fishing gear to avoid by-catch	
g)	Use of native species and subspecies in mariculture	
h)	Implementation of effective measures to prevent the inadvertent release of mariculture species and fertile polypoids.	
i)	Use of proper methods of breeding and proper places of releasing in order to protect genetic diversity	
j)	Minimizing the use of antibiotics through better husbandry techniques	
k)	Use of selective methods in commercial fishing to avoid or minimize by-catch	
I)	Considering traditional knowledge, where applicable, as a source to develop sustainable mariculture techniques	
m)	Not applicable	Х
Further comments on techniques that aim at minimizing adverse impacts of mariculture on marine and coastal biodiversity.		

# **Alien Species and Genotypes**

<b>160.</b> Has your country put in place mechanisms to control pathways of introduction of alien species in the marine and coastal environment? Please check all that apply and elaborate on types of measures in the space below.		
a)	No	
b)	Mechanisms to control potential invasions from ballast water have been put in place (please provide details below)	X
c)	Mechanisms to control potential invasions from hull fouling have been put in place (please provide details below)	X
d)	Mechanisms to control potential invasions from aquaculture have been put in place (please provide details below)	

e) Mechanisms to control potential invasions from accidental releases, such as aquarium releases, have been put in place (please provide details below)

f) Not applicable

Further comments on the current status of activities relating to prevention of introductions of alien species in the marine and coastal environment, as well as any eradication activities.

## Box LXIV.

Please elaborate below on the implementation of this programme of work and associated decisions specifically focusing on:

- a) outcomes and impacts of actions taken;
- b) contribution to the achievement of the goals of the Strategic Plan of the Convention;
- c) contribution to progress towards the 2010 target;
- d) progress in implementing national biodiversity strategies and action plans;
- e) contribution to the achievement of the Millennium Development Goals;
- f) constraints encountered in implementation.

The coastal and marine habitats and their biodiversity are critical to Qatar and the measures taken to protect these are yielding positive results in terms of habitat restoration and reductions in species loss.

# Agricultural biological diversity

<b>161.</b> ♦ Has your country developed national strategies, programmes and pl development and successful implementation of policies and actions that lead to t sustainable use of agrobiodiversity components? (decisions III/11 and IV/6)	ans that ensure the the conservation and		
a) No			
b) No, but strategies, programmes and plans are under development			
c) Yes, some strategies, programmes and plans are in place (please provide details below)	X		
d) Yes, comprehensive strategies, programmes and plans are in place (please provide details below)			
Further comments on agrobiodiversity components in national strategies, program	nmes and plans.		
<b>162.</b>			
a) No			
b) No, but potential measures are under review			
c) Yes, some measures identified (please provide details below)	X		
d) Yes, comprehensive measures identified (please provide details below)			
Further information on ways and means to address the potential impacts of getechnologies on the <i>In-situ</i> and <i>Ex-situ</i> conservation and sustainable use of agricultures of the conservation and sustainable use of agricultures.			
GURT is not used commercially in Qatar.			
Annex to decision V/5 - Programme of work on agricultural	biodiversity		
Programme element 1 - Assessment			
<b>163.</b> Has your country undertaken specific assessments of components of agr such as on plant genetic resources, animal genetic resources, pollinators, penutrient cycling?			
a) No			
b) Yes, assessments are in progress (please specify components below)	X		
<ul> <li>c) Yes, assessments completed (please specify components and results of assessments below)</li> </ul>			
Further comments on specific assessments of components of agricultural biodiver	rsity.		

<b>164.</b> Is your country undertaking assessments of the interactions between agricultural practices and the conservation and sustainable use of the components of biodiversity referred to in Annex I of the Convention (e.g. ecosystems and habitats; species and communities; genomes and genes of social, scientific or economic importance)?				
a) No				
b) Yes, assessments are under way	X			
c) Yes, some assessments completed (please provide details below)				
d) Yes, comprehensive assessments completed (please provide details below)				
Further comments on assessment of biodiversity components (e.g. ecosystems and communities; genomes and genes of social, scientific or economic importance.				
<b>165.</b> Has your country carried out an assessment of the knowledge, innovati farmers and indigenous and local communities in sustaining agricultural bid ecosystem services for food production and food security?				
a) No				
b) Yes, assessment is under way	X			
c) Yes, assessment completed (please specify where information can be retrieved below)				
Further comments on assessment of the knowledge, innovations and praction indigenous and local communities.	ices of farmers and			
<b>166.</b> Has your country been monitoring an overall degradation, restoration/rehabilitation of agricultural biodiversity since 1993 when the Conforce?				
a) No				
b) Yes, no change found (status quo)				
c) Yes, overall degradation found (please provide details below)				
d) Yes, overall restoration or rehabilitation observed (please provide details below)	x			
Further comments on observations.				
Though there has been both improvements and degradation the overall picture emerging is one where a significant improvement is discernible.				

Programme element 2 - Adaptive management	t				
<b>167.</b> Has your country identified management practices, technologies and policies that promote the positive, and mitigate the negative, impacts of agriculture on biodiversity, and enhance productivity and the capacity to sustain livelihoods?					
a) No					
b) No, but potential practices, technologies and policies being identifi	ed				
c) Yes, some practices, technologies and policies identified (ple provide details below)	ase X				
d) Yes, comprehensive practices, technologies and policies identified (please provide details below)					
Further comments on identified management practices, technologies and pol	licies.				
Programme element 3 - Capacity-building					
<b>168.</b> Has your country increased the capacities of farmers, indigenous and their organizations and other stakeholders, to manage sustainable agricultural biological diversity?	Itural biodiversity and to				
a) No					
b) Yes (please specify area/component and target groups with increased capacity)					
Further comments on increased capacities of farmers, indigenous and local communities, and their organizations and other stakeholders.					
Local communities are encouraged and supported to use locally adapted traditional varieties and to pursue practices such as the Hima system of traditional resource management, which contributes to enhancing the biodiversity base of crops.					
<b>169.</b> Has your country put in place operational mechanisms for participal stakeholder groups to develop genuine partnerships contributing to the programme of work on agricultural biodiversity?					
a) No					
b) No, but potential mechanisms being identified					
c) No, but mechanisms are under development	X				
d) Yes, mechanisms are in place					
<b>170.</b> Has your country improved the policy environment, including bene and incentive measures, to support local-level management of agricultural b					
a) No					
b) No, but some measures and arrangements being identified					
c) No, but measures and arrangements are under development	X				
d) Yes, measures and arrangements are being implemented (ple	ase				

specify below)				
Further comments on the measures taken to improve the policy environment.				
Programme element 4 – Mainstreaming				
<b>171.</b> Is your country mainstreaming or integrating national plans or strategies and sustainable use of agricultural biodiversity in sectoral and cross-sectoral plan				
a) No				
b) No, but review is under way				
c) No, but potential frameworks and mechanisms are being identified	Х			
<ul> <li>Yes, some national plans or strategies mainstreamed and integrated into some sectoral plans and programmes (please provide details below)</li> </ul>				
e) Yes, some national plans or strategies mainstreamed into major sectoral plans and programmes (please provide details below)				
Further comments on mainstreaming and integrating national plans or strategies and sustainable use of agricultural biodiversity in sectoral and cross-sectoral plan				
Qatar Agenda 21 is a key instrument in this respect				
<b>172.</b> Is your country supporting the institutional framework and policy and plant the mainstreaming of agricultural biodiversity in agricultural strategies and a integration into wider strategies and action plans for biodiversity?	ning mechanisms for ction plans, and its			
a) No				
b) Yes, by supporting institutions in undertaking relevant assessments	Х			
c) Yes, by developing policy and planning guidelines	Х			
d) Yes, by developing training material	Х			
e) Yes, by supporting capacity-building at policy, technical and local levels				
f) Yes, by promoting synergy in the implementation of agreed plans of action and between ongoing assessment and intergovernmental processes.				
Further comments on support for institutional framework and policy and planning mechanisms.				
<b>173.</b> In the case of centers of origin in your country, is your country promoti conservation, on farm, <i>In-situ</i> , and <i>Ex-situ</i> , of the variability of genetic reso agriculture, including their wild relatives?				
a) No				

Further comments on of the conservation of the variability of genetic resources for food and agriculture in their center of origin.

Yes (please provide details below)

Χ

#### Box LXV.

Please provide information concerning the actions taken by your country to implement the Plan of Action for the International Initiative for the Conservation and Sustainable Use of Pollinators.

#### Box LXVI.

Please elaborate below on the implementation of this programme of work and associated decisions specifically focusing on:

- a) outcomes and impacts of actions taken;
- b) contribution to the achievement of the goals of the Strategic Plan of the Convention;
- c) contribution to progress towards the 2010 target;
- d) progress in implementing national biodiversity strategies and action plans;
- e) contribution to the achievement of the Millennium Development Goals;
- f) constraints encountered in implementation.

Agrobiodiversity shows a general trend of improvement in certain segments and this could be further strengthened in the coming years.

# Forest Biological Diversity

# **General**

	is your country incorporated relevant parts of the work programm city strategies and action plans and national forest programmes?	e into your national
a)	No	
b)	Yes, please describe the process used	
c)	Yes, please describe constraints/obstacles encountered in the process	
d)	Yes, please describe lessons learned	Х
e)	Yes, please describe targets for priority actions in the programme of work	

Further comments on the incorporation of relevant parts of the work programme into your NBSAP and forest programmes

Qatar does not have terrestrial forest habitats but coastal mangrove forests dominated by *Avecennia* marina. Its protection has been incorporated in the national biodiversity strategy and action plan.

# **Box LXVII.**

Please indicate what recently applied tools (policy, planning, management, assessment and measurement) and measures, if any, your country is using to implement and assess the programme of work. Please indicate what tools and measures would assist the implementation.

The NBSAP addresses the protection of the mangroves. Protection is provided from overgrazing and supplementary planting is undertaken in selected areas.

#### Box LXVIII.

Please indicate to what extent and how your country has involved indigenous and local communities, and respected their rights and interests, in implementing the programme of work.

The local people are consulted in regulating grazing in the mangroves.

#### Box LXIX.

Please indicate what efforts your country has made towards capacity building in human and capital resources for the implementation of the programme of work.

No major initiative in this respect was warranted owing to the small size of mangroves as well as the dependent population.

# Box LXX.

Please indicate how your country has collaborated and cooperated (e.g., south-south, north-south, south-north, north-north) with other governments, regional or international organizations in implementing the programme of work. Please also indicate what are the constraints and/or needs identified.

No significant collaboration was made in this respect.

# Expanded programme of work on forest biological diversity

Programme element 1 – Conservation, sustainable use and bo	enefit-sharing
<b>175.</b> Is your country applying the ecosystem approach to the management of	of all types of forests?
a) No (please provide reasons below)	
b) No, but potential measures being identified (please provide details below)	
c) Yes (please provide details below)	Х

Comments on application of the ecosystem approach to management of forests (including effectiveness of actions taken, lessons learned, impact on forest management, constraints, needs, tools, and targets).

The basic concept of environmental management followed in Qatar is based on the teachings of the Quran and they correspond to the principles of ecosystem management, and because of this correspondence the ecosystem management concept receives ready acceptance in the country.

**176.** Has your country undertaken measures to reduce the threats to, and mitigate its impacts on forest biodiversity?

Options	X	Details
a) Yes	X	Please specify below the major threats identified in relation to each objective of goal 2 and the measures undertaken to address priority actions

	Invasives are not a serious problem in the mangroves.
	Forest fires are not a significant threat.
b) No	Please provide reasons below

Further comments on measures to reduce threats to, and mitigate the impacts of threatening processes on forest biodiversity (including effectiveness of actions taken, lessons learned, impacts on forest biodiversity, constraints, needs, tools and targets).

# **177.** Is your country undertaking any measures to protect, recover and restore forest biological diversity?

Options	X	Details	
a) Yes		Please identify priority actions in relation to each objective of goal 3 and describe measures undertaken to address these priorities	
	x	Reforestation is done in some sites where the mangroves have been degraded Endemics alone are used in the supplementary planting	
		One of the protected areas covers mangrove sites, more areas are planed to be brought under the PA network.	
b) No		Please provide reasons below	

Further comments on measures to protect, recover and restore forest biological diversity (including effectiveness of actions taken, lessons learned, impacts on forest biodiversity, constraints, needs, tools and targets).

# **178.** Is your country undertaking any measures to promote the sustainable use of forest biological diversity?

Options	X	Details	
a) Yes		Please specify priority actions in relation to each objective of goal 4 and describe measures undertaken to address these priorities	
	X	Regulated grazing being introduced will reduce and eliminate the unsustainable use	
		Grazing control is introduced in consultation with the local communities	
b) No		Please provide reasons below	

Further comments on the promotion of the sustainable use of forest biological diversity (including effectiveness of actions taken, lessons learned, impacts on forest biodiversity, constraints, needs, tools and targets).

**179.** Is your country undertaking any measures to promote access and benefit-sharing of forest genetic resources?

Options X Details		Details
a) Yes	X	Please specify priority actions in relation to each objective of goal 5 and describe measures undertaken
		The mangroves have not elicited interest to access so far.
b) No		Please provide reasons below

Further comments on the promotion of access and benefit-sharing of forest genetic resources. (including effectiveness of actions taken, lessons learned, impacts on forest biodiversity, constraints, needs, tools and targets)

## Programme element 2 - Institutional and socio-economic enabling environment

**180.** Is your country undertaking any measures to enhance the institutional enabling environment for the conservation and sustainable use of forest biological diversity, including access and benefit-sharing?

Options	X	Details
a) Yes		Please identify priority actions in relation to each objective of Goal 1 and describe measures undertaken to address these priorities
	x	Studies are being conducted in various habitats including the mangroves, and the results have been published as reports or journal papers.
b) No		Please provide reasons below

Further comments on the enhancement of the institutional enabling environment for the conservation and sustainable use of forest biological diversity, including access and benefit-sharing (including effectiveness of actions taken, lessons learned, impacts on forest biodiversity, constraints, needs, tools and targets).

**181.** Is your country undertaking any measures to address socio-economic failures and distortions that lead to decisions that result in loss of forest biological diversity?

Options	X	Details	
a) Yes		Please identify priority actions in relation to each objective of Goal 2 and describe measures undertaken to address these priorities	
	x	Economic evaluation of the environmental resources and their loss is increasingly being done; however methodologies need to be perfected to reflect these in the national accounting system.	
b) No	Please provide reasons below		

Further comments on review of socio-economic failures and distortions that lead to decisions that result in loss of forest biological diversity (including effectiveness of actions taken, lessons learned, impacts on forest biodiversity, constraints, needs, tools and targets).

**182.** Is your country undertaking any measures to increase public education, participation and awareness in relation to forest biological diversity?

Options	X	Details	
a) Yes		Please identify priority actions in relation to each objective of goal 3 and describe measures undertaken to address these priorities	
	X	Environmental awareness building is a key element of the conservation work, and the importance of mangrove ecosystems is emphasized in the programs.	
b) No	) No Please provide reasons below		

Further comments on measures to increase public education, participation and awareness in relation to forest biological diversity (including effectiveness of actions taken, lessons learned, impacts on forest biodiversity, constraints, needs, tools and targets).

# Programme element 3 – Knowledge, assessment and monitoring

**183.** Is your country undertaking any measures to characterize forest ecosystems at various scales in order to improve the assessment of the status and trends of forest biological diversity?

Options	ons X Details	
a) Yes	X	Please identify priority actions in relation to each objective of Goal 1 and describe measures undertaken to address these priorities

		As mentioned earlier, only the Avicennia marina dominated mangrove forests are found in the country.
b) No		Please provide reasons below
Further comments on characterization of forest ecosystems at various scales (including effectiveness of actions taken, lessons learned, impacts on forest biodiversity, constraints, needs, tools and targets).		

**184.** Is your country undertaking any measures to improve knowledge on, and methods for, the assessment of the status and trends of forest biological diversity?

Options	X	Details	
a) Yes	X	Please identify priority actions in relation to each objective of goal 2 and describe measures undertaken to address these priorities	
		The size of mangrove is small enough to have simple methods for assessment.	
b) No Please provide reasons below		Please provide reasons below	

Further comments on improvement of knowledge on and methods for the assessment of the status and trends (including effectiveness of actions taken, lessons learned, impacts on forest biodiversity, constraints, needs, tools and targets).

**185.** Is your country undertaking any measures to improve the understanding of the role of forest biodiversity and ecosystem functioning?

Options	X	Details
a) Yes	X	Please identify priority actions in relation to each objective of goal 3 and describe measures undertaken to address these priorities
		Studies on mangrove ecology is actively promoted.
b) No		Please provide reasons below

Further comments on the improvement of the understanding of the role of forest biodiversity and ecosystem functioning (including effectiveness of actions taken, lessons learned, impacts on forest biodiversity, constraints, needs, tools and targets).

**186.** Is your country undertaking any measures at national level to improve the infrastructure for data and information management for accurate assessment and monitoring of global forest biodiversity?

Options	X	Details
a) Yes	x	Please identify priority actions in relation to each objective of goal 4 and describe measures undertaken to address these priorities
	^	Although this is an issue of interest to Qatar, because of the rather small size of the mangroves, this is not an immediate priority
b) No Please provide reasons below		Please provide reasons below

Further comments on the improvement of the infrastructure for data and information management (including effectiveness of actions taken, lessons learned, impacts on forest biodiversity, constraints, needs, tools and targets).

#### Box LXXI.

Please elaborate below on the implementation of this programme of work and associated decisions specifically focusing on:

- a) outcomes and impacts of actions taken;
- b) contribution to the achievement of the goals of the Strategic Plan of the Convention;
- c) contribution to progress towards the 2010 target;
- d) progress in implementing national biodiversity strategies and action plans;
- e) contribution to the achievement of the Millennium Development Goals;
- f) constraints encountered in implementation.

Though the size of (mangrove) forest in the country is rather small in size, due attention is paid to the protection of the same, especially owing to its rarity. The conservation measures undertaken are expected to cause the enhancement of the mangroves.

Biological diversity of dry and sub-humid lands			
<b>187.</b> Is your country supporting scientifically, technically and financially, at the levels, the activities identified in the programme of work? (decisions V/23 and VI	_		
a) No			
b) Yes (please provide details below)	X		
Further comments on scientific, technical and financial support, at the national at the activities identified in the programme of work.	nd regional levels, to		
Protection of the biodiversity of dry and sub-humid lands assumes high importan	ce in Qatar		
<b>188.</b> Has your country integrated actions under the programme of work of dry into its national biodiversity strategies and action plans or the National Action the UNCCD? (decisions V/23, VI/4 and VII/2)			
a) No			
b) Yes (please provide details below)	X		
Further comments on actions under the programme of work of dry and sub-huinto national biodiversity strategies and action plans or the National Action Prog UNCCD.			
The national biodiversity strategies and action plans and national action programme to combat desertification addresses the issues of overgrazing, moisture retention, vegetation recovery, alternative livelihood for the nomadic pastoralists, promotion of the Hima system (traditional regulated resource use areas), etc.			

<b>189.</b> Has your country undertaken measures to ensure synergistic/collaborativ the programme of work between the national UNCCD process and other procenvironmental conventions? (decisions V/23, VI/4 and VII/2)	
a) No	
b) Yes, some linkages established (please provide details below)	

Further comments on the measures to ensure the synergistic/collaborative implementation of the

c) Yes, extensive linkages established (please provide details below)

Χ

programme of work between the national UNCCD processes and other processes under related environmental conventions.

Coordination mechanism between the national focal points of CBD and UNCCD, SCENR and Ministry of Municipal Affairs and Agriculture, is well in place.

# **Programme Part A: Assessment**

**190.** Has your country assessed and analyzed information on the state of dryland biological diversity and the pressures on it, disseminated existing knowledge and best practices, and filled knowledge gaps in order to determine adequate activities? (Decision V/23, Part A: Assessment, Operational objective, activities 1 to 6)

a) No	
b) No, but assessment is ongoing	
c) Yes, some assessments undertaken (please provide details below)	X
d) Yes, comprehensive assessment undertaken (please provide details below)	

Further comments on the relevant information on assessments of the status and trends and dissemination of existing knowledge and best practices.

Various studies on the environmental resources of the aridlands and their degradation have been done and the results are available in the form of reports/journal articles/books. An advanced monitoring system is being instituted to monitor the desertification trends.

## **Programme Part B: Targeted Actions**

**191.** Has your country taken measures to promote the conservation and sustainable use of the biological diversity of dry and sub-humid lands and the fair and equitable sharing of the benefits arising out of the utilization of its genetic resources, and to combat the loss of biological diversity in dry and sub-humid lands and its socio-economic consequences? (part B of annex I of decision V/23, activities 7 to 9)

a)	No	
b)	Yes, some measures taken (please provide details below)	X
c)	Yes, many measures taken (please provide details below)	

Further comments on the measures taken to promote the conservation and sustainable use of the biological diversity of dry and sub-humid lands and the fair and equitable sharing of the benefits arising out of the utilization of its genetic resources, and to combat the loss of biological diversity in dry and sub-humid lands and its socio-economic consequences.

These measures include sand dune stabilisation programs, extensive tree planting, establishment of protected areas, protection of critical wildlife species, promotion of the traditional Hima, water conservation measures, alternative rural livelihood programs for the nomadic pastoralists, etc.

192.	Has your	country	taken	measures to	o strengthen	national	capacities,	including	local	capacities,
to enl	hance the	impleme	ntation	of the prog	ramme of wo	ork?				

a) No
b) Yes, some measures taken (please provide details below)
c) Yes, comprehensive measures taken (please provide details below)
X

Further comments on measures taken to strengthen national capacities, including local capacities, to enhance the implementation of the programme of work.

Research and monitoring systems have been established and a network of extension offices has been set up across the country. Close interactions are held with the local communities in developing and implementing various programs in the arid areas.

### **Box LXXII.**

Please elaborate below on the implementation of this programme of work and associated decisions specifically focusing on:

- a) outcomes and impacts of actions taken;
- b) contribution to the achievement of the goals of the Strategic Plan of the Convention;
- c) contribution to progress towards the 2010 target;
- d) progress in implementing national biodiversity strategies and action plans;
- e) contribution to the achievement of the Millennium Development Goals;

d) Yes, all identified capacity needs met (please provide details below)

f) constraints encountered in implementation.

The Qatar Agenda 21 has created a basis for the environmental recovery of the arid areas and the biodiversity therein. Although there are still impediments, the results of the programs to restore the aridland biodiversity are visible and it is expected to further improve the conservation of the arid and semi humid ecosystems of the country.

# **Mountain Biodiversity**

# Programme Element 1. Direct actions for conservation, sustainable use ad benefit sharing 193. Has your country taken any measures to prevent and mitigate the negative impacts of key threats to mountain biodiversity? a) No b) No, but relevant measures are being considered c) Yes, some measures taken (please provide details below) d) Yes, many measures taken (please provide details below) Further comments on the measures taken to prevent and mitigate the negative impacts of key threats to mountain biodiversity No significant mountains occur in Qatar.

194. Has your country taken any measures to protect, recover and restore mou	ntain biodiversity?
a) No	
b) No, but some measures are being considered

206. Has your country contributed to the assessment of the regional and subregional mechanisms for implementation of the Convention? (decision VI/27 B)

a) No
b) Yes (please provide details below)

Further comments on contribution to the assessment of the regional and subregional mechanisms.

#### Box LXXIV.

Please elaborate below on the implementation of the above decisions specifically focusing on:

- a) outcomes and impacts of actions taken;
- b) contribution to the achievement of the goals of the Strategic Plan of the Convention;
- c) contribution to progress towards the 2010 target;
- d) progress in implementing national biodiversity strategies and action plans;
- e) contribution to the achievement of the Millennium Development Goals;
- f) constraints encountered in implementation.

The State of Qatar plays a important role in promoting international and regional cooperation for the effective implementation of CBD, in addition to the bilateral initiatives in this respect (also the country was chosen to chair the G-77 at the 7<sup>th</sup> meeting of the CoP). The country is committed to further support international cooperation initiatives to effectively implement the CBD.

## F. COMMENTS ON THE FORMAT

# Box LXXV.

Please provide below recommendations on how to improve this reporting format.

Some questions were repetitive and this may be avoided in future, this could also reduce the length of the report. There may be provision in the future reports for reporting infractions of the Convention provisions on access and benefit sharing.
