Save-Tiger Signage Board-4

Forest Gate at Bhandarpani in the Ramnagar Forest Division, Uttarakhand

To raise the public awareness about the continuously declining population status of the Roral Bengal Tiger (*Panthera tigris tigris*) in India, Conservation Himalayas installed SAVE-TIGER Signage Boards at four tourist zones of the tiger range habitats in Uttarakhand, India as a part of its tiger conservation education mission project in Uttarakhand under the auspices of the U.S. Fish & Wildlife Service. The supportive collaboration of the Uttarakhand Forst Department and partnership privilege with the Countdown 2010 and IYB-2010 is highly acknowledged.
