

On June 8, 2010 Lincoln Corner Karachi, in connection with World Ocean Day 2010, hosted a video screening of " Georgia Aquarium : keepers of the deep" for 17 members of LCK-Kids Club.

LCK-Coordinator briefed the audience how life under the sea is significant for the biodiversity and what role does it require from us and World Ocean day is celebrated to make everyone feel the connection of a living being with an ocean.. As the largest aquarium in the world with over 8 tons of water, the Georgia Aquarium in downtown Atlanta offers a lot of exciting and fun things to do. Explore the aquarium through its various galleries. The 30 minutes video goes behind the scenes to see how scientists, engineers, and veterinarians are creating and managing the Georgia Aquarium, the world's newest and largest aquarium. Management and care of the vast array of fish and mammals requires new techniques and technologies, and many species can now be studied in-depth for the first time. Medicine, biology, zoology, environmental science and engineering all come to play in creating this new aquarium adventure.

It also shared with the children, status of Pakistan's ocean life through the orientation of a local scuba diving club, which also video documented sea life of Karachi's coastal area.

This video screening program provided an orientation of the biodiversity on earth & its challenges in reference with Ocean life. It also introduced them to amazing Georgia Aquarium in USA.
