

# The Tree's Genie

Once upon a time, there was a group of children playing on their farm. They were very cruel. They did not care about the environment around them.. They used to throw stones on trees and break their branches. The tree leaves fell a lot and the branches were falling one after one.

One day, while the children were playing through the trees, a big and scary genie came out. The children got very scared and ran away. The genie said angrily "come here nasty children" . Very afraid, the children said "what do you like devil?"

The Genie " I am not evil, I am the tree's guard. My job is to protect these trees. I was patient with you, but now I am no more. You were very cruel. Instead of planting trees you destroyed them. You forgot that you benefit a lot from these trees. It is thanks to these trees that you have a clean and clear environment. Trees provides you also with different kinds of food. They can even provide you with a shelter in the hot weather".

The children "We are very sorry. We promise we will never do these wrong deeds again".

The Genie " I am very glad because you recognize your fault. Now, let us gather these falling leaves and I will invite the environment friends to help us plant many trees".
