# STOCKTAKING ,COORDINATION & DEVELOPMENT of MONITORING PLAN : MEETING FOR ACHEVINH AICHI BIODIVERSITY TARGET 11 BY 2020

## UPDATE FROM SOUTH EAST ASIA

### 25-27 April 2019
### Isle of Vilm , Germany

Convention on
Biological Diversity

Japan Biodiversity Fund

# CAVEATS

**Priority Actions are, at the outset, ideas and suggestions requested from ASEAN Member States in an informal workshop organized by a duly-mandated ASEAN inter-governmental organization, ASEAN Centre for Biodiversity**

**They should not be understood as official statements of policy as they will still undergo further discussions at the various levels of authority in the AMS**

# Current Status

*e.g. Coverage of areas for terrestrial and marine PAs*

CAMBODIA -  Existing Terrestrial PAs 7,412,392.67 ha, approx.  41% (December 2018)
- Increase 2 new PA in Ramsar sites. 7 other new natural heritage sites (PA) also proposed
- Existing Marine PA 52,498 ha (August 2018)
- Increase 2 new CMPAs

INDONESIA - marine MPAs - by 2020, target is at 20 million has; at present they are at 104% realization
- by 2030, target is at 30 million has (300,000 sq.km
- new identified areas to be protected  25, 147.09 sq.km
- CTI - 150, 753.22 sq.km

MYANMAR - increase in terrestrial PAs - 4,596.549024 sq.km, for 2019-2020
- increase in marine PAs -   1,818.08667 sq.km, for 2019-2020

THAILAND - increase in marine PAs - 229.124 (sq.km or has, for clarification) (Ko Kra archipelago)

# Gaps

*Specific gaps identified for elements of Target 11*
*(e.g. PA coverage, ecological representation, coverage of areas important for biodiversity, etc.)*

MYANMAR -  12597.92 sq.km, by 2020-2021
　　　　　　　- establish new PAs in under-represented Eco-regions (Taninthayi, Kachin, Kayah, Kayin and
　　　　　　　　Sagaing Regions)

SINGAPORE - connectivity and corridors
　　　　　　　-360km of park connectors
　　　　　　　-100km of Nature Ways
　　　　　　　- 200ha of skyrise greenery

**Convention on
Biological Diversity**

# Regional Partners

*What partners have been identified?* those who attended the workshop

*   IUCN; IUCN-WDPA;
*   Wildlife Conservation Society
*   Flora and Fauna International - Myanmar
*   WWF-Philippines
*   Tebtebba Foundation
*   Haribon Foundation

*Who is doing what?*

*   IUCN offered membership to APAP; Green List orientations

*What work is ongoing to address specific gaps?*

ASEAN Member States, through the units in the appropriate ministries dealing with PAs, are at the moment working to address challenges in implementation arising from Target 11 commitments

**Convention on Biological Diversity**

# Proposed Regional Action Plan (June-Dec 2019)

*A. Fine-tune Priority Action Plans*
- validating the numbers and further specifics from commitments made

*B. Fast-tracking/Regular Monitoring of PAs already in the pipeline*

*C. OECM Regional Initiative*

1. in-depth seminar on methodologies; technical guidelines
2. inventory of possible areas for consideration as OECMs; including existing approaches like Ramsar declaration, etc.
3. coordinated actions to identify, recognize OECMs by Oct 2020

*C. Resource Mobilization*

1. Refine funding requests made
2. Package the funding requests into specific proposals; secure funding and provide to requesting AMS

*D. Expert Pooling and Deployment*

1. Prioritize requests for technical support
2. Identify technical groups/institutions willing to provide technical assistance
3. Deployment to Requesting country

**Convention on Biological Diversity**

# Ideas for Monitoring

Ideas for monitoring

 - agreering on the specific data sets to be monitored
 - pinpointing the right official with sufficient level of authority who may be willing to provide information
 - global datasets may be presented for validation
 - putting together all other types of information from various sources

# WAY FORWARD?

CBD Secretariat to continuously cajole and request CBD Parties for action

Regional Implementation Support hubs can only do so much, perhaps communication/notification from ES and posted in CBD website may help and other compliance mechanisms

submission of lessons learned and subsequent actions to post-2020

ASEAN post-2020 workshop 1 results :

VISION - a quantifiable target to ensure ecosystem integrity; transforming cross-sectoral collaboration including mindsets through mainstreaming across sectors

four thematic areas generated various suggestions - mainstreaming
- resource mobilization
- communication
- integrating diverse perspectives

**Convention on Biological Diversity**

thanks a lot!`
