Title example: *Action Plan for Latin America, to achieve Aichi target 11 with attendant multiple benefits By October 2020.*

INDEX

ACRONYMS

EXECUTIVE SUMMARY (1 page limit max)

The executive summary sums up the ACTION PLAN priorities and opportunities in a tight document. The executive summary is a very important part of the document that precedes the action plan when seeking new partners. This will also tell our allies (Party members, cooperation organizations, amongst others) what needs to be done, and how we plan to achieve it in a very specific (not generic) and in a precise manner.

It should be no more than 1-3 pages long and should be written in third person, as well as written in the same order as the full action plan.

BACKGROUND (1 page limit max)

Here, we will explain the background of the current strategy such as the CoP decisions which precede current SCBD II Phase strategy, as well as any particular regional context.

AICHI TARGET 11 CURRENT STATUS (Status, gaps). (2 page limit max)

In this chapter, we will describe in detail the current status of implementation of at least six out of the nine elements of Aichi Target 11. Please provide graphs that show the current status.

Clearly identify the Gaps for the elements.

PRIORITIES IDENTIFIED FOR THE REGION (The establishment of Activities in relation to identified commitments and opportunities).

In this section, we will describe the Activities of our action plan. What needs to be achieved based on previous discussion and identifications on gaps, commitments and opportunities? The actions must be very specific and precise (not generic). It must detail How is involved? Where are the actions located? What resources will we need? And what are the possible barriers and how to overcome them?

The Activities must be measurable: How many countries? How many Protected Areas?, How many km²? In what percentage?

Activities must be achievable by JULY 2020. So only include those actions, commitments and opportunities that are already in the pipeline or realistic to occur.

Another important step is to ensure if the Activity or action is relevant for the target; Does this align with the other goals? Is it the right time?

And finally, it must be time-bound. Set a target date so there is a deadline to focus on.
